

Statement for Minor Material Amendment

344-01 All Hallows, Gospel Oak **2016/1478/P**

April 2017

Permission as approved

The approved scheme does not contain external lighting.

Proposed variation

To amend the permission in order to provide low-intensity external lighting when the church is in use.

Variation: To include Logic F1 path lighting by Deltalight to provide illumination of the ground.

Justification: To provide safe access on the site. To minimise the risk of people tripping over the approved bollard posts along the edge of the site. The font of the church is poorly illuminated by the existing street lighting.

Variation: To include Logic R Wallwash and Logic R washers by Deltalight to illuminate the west door and the cross.

Justification: To provide illumination for people using the church after dark and to create a safe environment. The font of the church is poorly illuminated by the existing street lighting.

Variation: To include Tiga LED wall lights and Kix 3030 spots by Deltalight to illuminate the new (approved) courtyard.

Justification: To provide an amenity for use when the courtyard in front of the annexe is in use. To create a safe environment and discourage loitering.
