Dear Kate,

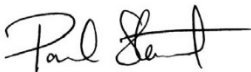

Middlesex Hospital Annex – Basement Impact Assessment Update

As noted in our email correspondence of 21st March 2017 we are pleased to provide information and reports, which have been prepared specifically for the project. We have copied this information package to your auditor Graham Kite at Campbell Reith. As requested in Appendix 2 of Campbell Reith's audit report we are pleased to provide the following information:

- Site Investigation Report (SIR) – provides a summary of investigation works carried out at site and locally
- Phase 2 Preliminary Geotechnical Interpretative Report (GIR) – includes a site conceptual site model, geotechnical design parameters and recommendations for further investigation works
 - Proposed retaining wall system – the GIR includes preliminary wall design, construction staging and sequence, temporary propping arrangements
- Ground Movement Assessment Report (GMR) – includes a preliminary damage assessment
 - Monitoring proposals – the GMR includes monitoring requirements and methodology
 - Mitigation measures – the GMR notes several potential mitigation measures, however from this assessment stage these are not demonstrated to be required
- Basement Construction Programme – a preliminary basement construction sequence and provisional programme is provided in the Appendix B of the Basement Impact Assessment
- Basement Impact Assessment (BIA) – updated report with a summary of information from the above items
 - BIA Non-Technical Summary – the BIA includes a Non-Technical Summary

We trust that the information listed above meets your expectations and requirements for this stage. If there are queries on any aspects please let me know.

Yours sincerely,

Paul Stewart
