SHOULD A DISCREPANCY BE IDENTIFIED THE CONTRACTOR IS TO REQUEST VERIFICATION FROM THE CONTRACT ADMINISTRATOR BY WAY OF INSTRUCTION PRIOR TO PROCEEDING WITH THE ASSOCIATED WORK OR ORDERING OF MATERIALS.

THE CONTRACTOR IS RESPONSIBLE FOR CHECKING DIMENSIONS. ANY DISCREPANCY TO BE VERIFIED WITH THE ARCHITECT'S BEFORE PROCEEDING WITH ANY WORKS.

**CHANGES:**

- Level 7 glazing system reverted from toggle to cap and additional horizontal transom introduced due to fire rating restrictions on glass panel sizes.
- Roof plant equipment sits 300mm higher than plant enclosure.
- There is an increased height on levels 6, 7 and Roof Plant in order to accommodate higher clear ceiling heights. Level 6 (FFL) has been increased by 150mm, level 7 (FFL) by 300mm and the roof plant level by 450mm which is the total increase of the mass in terms of height. The top roof level has remained intact.
- Level 7 NW corner elevation has been recessed to allow space for abseiling and avoid any over sailing above neighbour's property.
- Level 1 top vertical fins reduced from No 3 to 2 following facade design development.

DO NOT SCALE DRAWINGS.

FIGURED DIMENSIONS TO BE WORKED IN ALL CASES. ALL DIMS ARE IN mm UNLESS OTHERWISE STATED.
