Dear James,

A client at 37 Tanza Road has been sent an enforcement letter by Camden regarding his unsafe wall.

Beside the wall and possibly the reason for the problem are a group of small trees including a self seeded ash approx 12cm in diameter, a multi stemmed bay the largest stem being approx 12cm and a few small cherries less than 10cm in diameter

Can we remove these to allow the wall to be reinstated or do we need to submit a notice first to the planning dept.

Please see attached photos.

Best regards,
