2017/2326/T	Kate Shaughnessy	Cround Floor Flat 20 Kylemore Road London NW6 2PT	29/04/2017 15:02:26	COMMNT	I oppose the careless and thoughtless destruction of trees by residents who are clearing to have extensions done. Trees are an amenity for our communal health. The air quality in London is notoriously disgusting and chopping down trees like this is not helping. Environment, environment, environment. he population old and young are suffering from this wanton destruction.,
2017/2326/T	Blair	East Heath Road	30/04/2017 14:46:37	OBJEMPER	Birch is particularly effective at removing pollutants from the atmosphere, and this tree should not be felled unless the Applicant plants another in its place. From: https://laqm.defra.gov.uk/laqm-faqs/faq105.html 2. Removal of Air Pollutants: Trees can remove gaseous air pollution either through uptake via leaf stomata or the plant surface. Once inside the leaf, gases diffuse into intercellular spaces and may be absorbed by water films to form acids or react with inner-leaf surfaces. Recent research suggests that the planting of trees along the sides of roads could reduce NO2 concentrations in addition to providing amenity value [1]. Trees can also remove pollution by intercepting airborne particles.
