Removal of Air Pollutants: Trees can remove gaseous air pollution either through uptake via leaf stomata or the plant surface. Once inside the leaf, gases diffuse into intercellular spaces and may be absorbed by water films to form acids or react with inner-leaf surfaces. Recent research suggests that the planting of trees along the sides of roads could reduce NO2 concentrations in addition to providing amenity value [1]. Trees can also remove pollution by intercepting airborne particles.</p>
2017/2397/T	Kate Shaughnessy	Cround Floor Flat 20 Kylemore Road London NW6 2PT	29/04/2017 15:06:44	COMMNT	This is an irresponsible felling of trees which help to clean our environment. All trees do this whether fancy or not so I oppose this thoughtless destruction in the name of greed.
