2017/2125/P	a peyser	7 iverson road	10/05/2017 22:09:45	OBJ	<p>This application is misleading as large french windows were made in the ground floor flats straight onto the MUGA without permission. Thus the application refers not only to 4 units but to at least 7 units. The rear extensions are now erected in bricks that do not match surrounding buildings. Work has taken place on bank holidays and on saturday afternoons. The developers are not showing any consideration to pedestrians on Kilburn High road, often blocking the pavement without alternative pedestrian protection. This development is not in keeping with the area and the addition of air conditioning units to each flat hardly meet any sustainability requirements. This is an over-development providing substandard accommodation to maximise profit without contributing to the local amenities. This will disturb the use of the MUGA in grange park. Please change the plans to remove the large openings at ground floor level to the MUGA site, do not allow airconditioning units and force the developer to use bricks similar to existing bricks for the extensions, should permission be given.</p>
