2017/2068/P	Wim van de Vegte	20 Flat B Lawn Road NW32XR NW32XR	09/05/2017 22:50:27	OBJ	As before, I object again to the proposal on the following grounds: *The effect of the Antennas on children and adults health is a concern to me. Independent research shows that high levels of electromagnetic radiation can have harmful effects on health especially that of children. *The lack of reasonable justification for the above installation, signals in this area are more than adequate already. *Aesthetically unacceptable in a conservation area. Lawn Road is part of the Parkhill Conservation Area. The installation of the antennas would be totally inappropriate.
2017/2068/P	Wim van de Vegte	20 Flat B Lawn Road NW32XR NW32XR	09/05/2017 22:50:44	OBJ	As before, I object again to the proposal on the following grounds: *The effect of the Antennas on children and adults health is a concern to me. Independent research shows that high levels of electromagnetic radiation can have harmful effects on health especially that of children. *The lack of reasonable justification for the above installation, signals in this area are more than adequate already. *Aesthetically unacceptable in a conservation area. 2017/2068/P	Gill Fry	22 Troyes House Lawn Road London NW3 2XT	10/05/2017 10:53:26	OBJ	Less than six months ago the residents of Troyes House and neighbours objected to this same proposal. How can it be proposed again when there was so much unease at the plans? I object to this new proposal for the same reasons as before: health reasons particularly for the young, elderly and vulnerable people in close proximity; because the building is not even high enough to warrant it; because it is in a conservation area; this lovely 1950s building is balanced and well-proportioned and the masts etc will look very ugly and out of place; Camden Council could do something positive with the roof like solar energy units; Camden Council should respect our wishes and have a duty to put our health and wellbeing first.
2017/2068/P	L Gurhey	11 Troyes House Lawn Road NW3 2XT	10/05/2017 11:04:16	OBJ	I object strongly to this application, We are in a conservation area and this application was rejected six months ago on these grounds, the masts would look ugly on this low rise block. There is no proof that these masts are safe, I would be sleeping directly underneath these masts and would be so frightened for my health.
2017/2068/P	Don Stewart	First Floor Flat 10 Upper Park Road London NW3 2UP	11/05/2017 10:36:19	OBJ	I am shocked to see that, despite the refusal of planning permission in October last year, Waldon Telecoms have put in another application to install phone masts on the top of Troyes House - and that the new application is even more intrusive and offensive in a conservation area than earlier one. I am also worried by the prospect of having phone masts so close to my house. I know that many people say they are safe but I do not think we know enough about mobile phone radiation to be sure and I am really concerned about the effect it might have on my health.

2017/2068/P	Monica Lotta	20 Flat B Lawn Road NW32XR NW32XR	09/05/2017 22:48:38	COMMNT	As before, I object again to the proposal on the following grounds: *The effect of the Antennas on children and adults health is a concern to me. Independent research shows that high levels of electromagnetic radiation can have harmful effects on health especially that of children. *The lack of reasonable justification for the above installation, signals in this area are more than adequate already. *Aesthetically unacceptable in a conservation area. Lawn Road is part of the Parkhill Conservation Area. The installation of the antennas would be totally inappropriate.
2017/2068/P	Rosamund Irwin	23 Troyes House Lawn Road NW3 2XT NW3 2XT	10/05/2017 13:43:59	INT	I object strongly to this proposal. Lawn Road is in a conservation area and as such should be protected from unsightly additions to the buildings. The proposed mobile phone masts covered in panels would look ludicrous stuck on top of Troyes House. The open position of Troyes House at the end of the road makes it all the more important to maintain it's simple lines, and the panels and support posts on the roof would make it look industrial. Please refuse planning permission for these monstrosities.
