Published November 2010.

Camden's Local Development Framework. Core Strategy 2010.

## Section 1

# Location and management of Camden's growth

- 1.1 Camden is growing and changing. It is estimated that our population will increase by around 36,000 people (about 18% of total population) between 2006 and 2026, while London will grow by over a million people over the same period (15%). Future growth in Camden will be largely due to there being more births than deaths in the borough, although in-migration will also be a factor. In addition, our population is growing older with increases in the proportion of working age people over 45 and those of pensionable age between 60/65 and 74. (GLA Round 2006 Demographic Projections).
- 1.2 The forecast growth in population will be accompanied by an increase in the number of homes, offices and other land uses. The Mayor of London's London Plan contains a target of 5,950 additional homes in Camden from 2007/8 to 2016/17, which we are expected to exceed (see paragraph 1.7). National planning policy also promotes increasing the supply of homes. The Core Strategy must be consistent with national policies and in general conformity with the London Plan.
- 1.3 *A sustainable Camden that adapts to a growing population* is one of the four themes within the vision of *Camden Together*, Camden's Community Strategy. The Community Strategy says that we will find ways to adapt to Camden's growing population while protecting, promoting and enhancing our environment for us and for future generations. The Core Strategy is one of the main mechanisms for achieving this aim.
- 1.4 This section sets out the Council's overall spatial strategy for the borough. It explains where Camden's future growth and development will be focussed, gives more detail on our approach to growth areas, other highly accessible areas and areas which will experience more limited change. It also sets out our overarching approach, further developed in sections 2 and 3, to managing growth in a way that provides necessary homes, jobs and facilities and protects and improves Camden's environment, heritage and quality of life.

# CS1. Distribution of growth

- 1.5 Many parts of the country are facing the challenge of where and how to accommodate a growing and changing population and the facilities and infrastructure needed to support it. Camden's character – as an already highly built up, inner London area, with limited land available for development, many established residential areas, often mixed with other uses, and many places of heritage, environmental and community value – mean that we face particular challenges in adapting to our growing population while improving and protecting our environment and quality of life. Policy CS1 sets out our overarching approach to the location of future growth and development in the borough.

## CS POLICY

### CS1 – Distribution of growth

#### Overall approach to growth and development:

The Council will focus Camden's growth in the most suitable locations, and manage it to make sure that we deliver its opportunities and benefits and achieve sustainable development, while continuing to preserve and enhance the features that make Camden such an attractive place to live, work and visit.

We will promote:

- a) a concentration of development in the growth areas of King's Cross, Euston, Tottenham Court Road, Holborn and West Hampstead Interchange;
- b) appropriate development at other highly accessible locations, in particular Central London and the town centres of Camden Town, Finchley Road / Swiss Cottage, Kentish Town, Kilburn High Road and West Hampstead; and
- c) more limited change elsewhere.

Following this approach, the Council expects that in the order of 12,250 additional homes will be provided in Camden between 2010/11 and 2024/25. We will identify, and provide guidance on, the main development opportunity sites in the borough through our Camden Site Allocations Local Development Framework document.

#### Making the best use of Camden's limited land

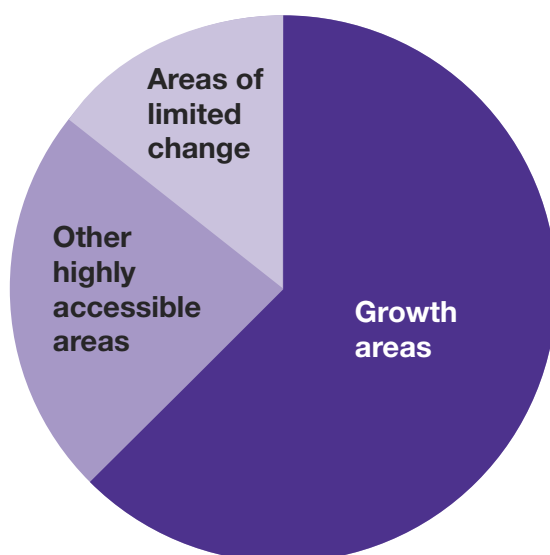

The Council will promote the most efficient use of land and buildings in Camden by:

- d) seeking development that makes full use of its site, taking into account quality of design, its surroundings, sustainability, amenity, heritage, transport accessibility and any other considerations relevant to the site;
- e) resisting development that makes inefficient use of Camden's limited land;
- f) expecting development that will significantly increase the demand of travel to be located in growth areas and other highly accessible parts of the borough;
- g) expecting high density development in Central London, town centres and other locations well served by public transport; and
- h) expecting the provision of a mix of uses in suitable schemes, in particular in the most accessible parts of the borough, including an element of housing where possible.

## Overall approach to growth and development

- 1.6 The Council's overall strategy for managing future growth in Camden is to promote the provision of homes, jobs and other facilities in areas with significant redevelopment opportunities at, or near, transport hubs, and support appropriate development at other accessible locations, with more limited change elsewhere. This approach will:
- focus growth on places that can support higher density development, reducing pressure for substantial development in predominantly residential areas (although some development will take place throughout the borough);
  - allow us to better 'shape' places by promoting high quality design of buildings and places, securing necessary infrastructure, providing an appropriate mix of uses, including community facilities, and securing regeneration benefits; and
  - through promoting larger schemes increase our ability to provide more sustainable places, for example by maximising opportunities for local power and heating.
- 1.7 We expect our strategy to provide approximately 12,250 additional homes (including 9,850 new self-contained homes) between 2010/11 and 2024/25. This provision is expected to include around 7,250 homes from sites of 10 homes or more. The diagram below shows how these homes will be distributed around the borough. Just over 60% will be on sites in the growth areas, just over 20% will be in other highly accessible areas, and around 15% will be in areas of more limited change. In addition c2,600 homes will be provided from smaller sites and c2,400 from non-self contained dwellings and vacancies being returned into use. On the basis of past trends, we expect these homes to follow broadly the same distribution around the borough. This gives a total of around 815 homes per year between 2010/11-2024/25, which comfortably exceeds Camden's current London Plan target of 595 homes per year between 2007 and 2017. This means that we can meet our housing targets even if some identified sites do not come forward for development as envisaged.

### Distribution of new homes by area 2010-2025 (based on identified sites for 10 or more homes)

- 1.8 Housing will be considered the priority land use of this Core Strategy and the Council's other Local Development Framework documents. Please see *policy CS6 – Providing quality homes* for our detailed approach to housing, and paragraphs 6.8 to 6.18 for more detailed information on our housing targets and the type of housing that will be provided.

- 1.9 The Council’s overall spatial strategy is illustrated on Map 1 – Key Diagram. This shows the broad location of Camden’s growth areas, other highly accessible locations / town centres, major transport schemes and the borough’s main open spaces.
- 1.10 A key part of our strategy is to ensure that our growing population is supported by necessary infrastructure and services. The Camden Infrastructure Study 2009, commissioned by the Council, identified the borough’s infrastructure needs over the fifteen year period covered by this Core Strategy, taking into account expected growth. This forms the basis of Appendix 1 which sets out key infrastructure programmes and projects needed to deliver the Core Strategy. Section 4 sets out more detail on our approach to the provision of infrastructure. Developments will be expected to make appropriate contributions towards the infrastructure needs they generate.

**Growth areas**

- 1.11 King’s Cross, Euston, Tottenham Court Road, Holborn and West Hampstead Interchange will be the locations for the largest amount of Camden’s future growth. These areas are identified in the London Plan as suitable for large scale redevelopment or significant increases in jobs and homes, and are based around transport interchanges where increased capacity is planned. The majority of these areas are within Central London and therefore their redevelopment will contribute towards the continued success of Central London and to London’s national and international role, as well as providing opportunities to bring benefits to the borough and the local area. Please see policy CS9 – *Achieving a successful Central London* for our overall approach to Central London.
- 1.12 King’s Cross will be the focus of the most growth in Camden up to 2025, with large-scale redevelopment transforming the area and creating a new quarter for Camden and London. Redevelopment at Euston and around Tottenham Court Road will also provide substantial numbers of jobs and homes, as well as other uses and facilities. Development at West Hampstead Interchange is expected to be predominantly housing. Policy CS2 – *Growth areas* gives more detail on our approach to Camden’s main growth areas. The boundaries of the growth areas are shown on Maps 11-15 in Appendix 6.
- 1.13 King’s Cross, Euston and Tottenham Court Road (part in Westminster) are included in the London Plan as Opportunity Areas, that is, places able to accommodate substantial new jobs and homes, in association with public transport improvements. Holborn, West Hampstead Interchange and Farringdon/Smithfield (much of which lies in the City of London and Islington) are designated as Areas for Intensification, places with significant potential for redevelopment for housing, employment and other uses, although at a scale less than that for Opportunity Areas, again in association with public transport improvements.
- 1.14 Known development sites in the growth areas and at other locations throughout the borough, and the Council’s expectations for them, are identified in the *Camden Site Allocations* document, which also forms part of our Local Development Framework.

Map 1: Key Diagram

**Other highly accessible locations**

- 1.15 Beyond the growth areas there are a number of other parts of the borough which are considered suitable locations for significant development as they are highly accessible by a range of means of transport. These highly accessible areas are the Central London area outside of the growth areas, and the town centres of Camden Town, Finchley Road/Swiss Cottage, Kilburn High Road, Kentish Town and West Hampstead. These areas are considered to be particularly suitable locations for uses that are likely to lead to a significant increase in travel demand (for example, retail, offices, leisure and tourism), although the scale of development at these locations is expected to be less than that in the growth areas. Public transport accessibility to Hampstead is not considered to be sufficient for it to be a suitable location for uses that generate significant travel demand.
- 1.16 Policy CS3 gives more detail on our approach to Camden's other highly accessible locations. Policy CS9 sets out our overarching approach to Central London, with its unique character and challenges, where we seek to achieve a balance between its important contribution to London and the UK and local communities and facilities. Policy CS7 sets out our approach to Camden's town centres.

- 1.17 We will expect activities that are that are likely to lead to a significant increase in travel demand to be located in these parts of the borough or the growth areas. The Council will require applicants to demonstrate that all potential options for development in these areas have been thoroughly assessed before edge-of-centre and, finally, sites outside these areas are considered for development, taking into account their accessibility by a choice of means of transport; their likely effect on travel patterns and car use. This approach will help to reduce the need for car journeys, help promote walking, cycling and public transport and allow a single journey to serve more than one purpose. For more information on the level of development we consider creates significant travel demand please see Appendix 1 in Camden Development Policies.

### **Areas of more limited change**

- 1.18 Other parts of the borough are generally expected to experience more limited development and change than will occur in the growth areas and other highly accessible locations. The scale of this will vary, from areas adjacent to growth areas, such as Somers Town, where the Council will seek to spread the redevelopment benefits of nearby schemes, to predominantly residential areas, where smaller scale and more incremental change is expected take place. Policy CS4 gives more detail on these areas and the Council's approach to them.

### **Managing growth**

- 1.19 Central to the Council's overall approach to adapting to Camden's growing population is managing future growth to make sure that it is sustainable, that it provides opportunity and benefits to the borough and its local area, and that it protects and enhances our environment, heritage and quality of life.
- 1.20 Our overall approach to managing the impact of growth is set out in policy CS5, while more detail on aspects of our approach to managing growth is given in many other policies in this Core Strategy, particularly those in section 3 – *A sustainable and attractive Camden*, for example policy CS13 on tackling climate change and CS14 on promoting high quality places and conserving our heritage. Camden Development Policies contains detailed planning policies to support our strategy of managing growth, for example on high quality design (DP24), sustainable design and construction (DP22), and the impact of development on occupiers and neighbours (DP26).

### **Making the best use of Camden's limited land**

- 1.21 If we are going to adapt successfully to Camden's growing population, we need to make the best use of the borough's limited land. The Council will promote the most efficient use of Camden's land and buildings while also seeking to improve the quality of our environment, protect the amenity of occupiers and neighbours and meet its other planning objectives.

### **Density**

- 1.22 One way of making the most efficient use of our land and buildings is to encourage higher densities (that is, have more buildings or rooms in a given area). The Council wants to encourage developments with high densities in the most accessible parts of the borough (generally, Central London and the town centres of Camden Town, Finchley Road/Swiss Cottage, Kilburn High Road, Kentish Town and West Hampstead) and other appropriate locations. Such schemes should be of excellent design quality and sensitively consider the amenity of occupiers and neighbours and the character and built form of their surroundings, particularly in conservation areas. Good design can increase density while protecting and enhancing the character of an area. (Please see policy CS14 and Development Policies DP24 and D25 for more detail on our approach to design.)
- 1.23 The Council will expect the density of housing development to take account of the density matrix in the London Plan (Table 3A.2). As Camden is generally well served by public transport, the Council will expect densities towards the higher end of the appropriate density range in the matrix unless it can be demonstrated that the specific circumstances of a development mean this is not appropriate. Densities below the relevant range in the density matrix will not be permitted. In addition, development schemes with a density below that of the surrounding area will normally be resisted. Please also see paragraphs 2.9 to 2.10 in Camden Development Policies for more on our approach to density.

## Mixed use developments

- 1.24 The provision of an appropriate mix of uses, both within areas and in individual buildings, can also contribute to successfully managing future growth in Camden and making efficient use of its limited land. A mix of uses can also:
- reduce commuting and the need for some other journeys, helping to cut congestion in the borough and improve air quality;
  - increase the provision of much-needed housing;
  - promote successful places that have a range of activities and are used throughout the day, increasing safety and security.
- 1.25 The Council will encourage the provision of a mix of uses in suitable locations and expect development proposals of an appropriate size in Central London and the town centres of Camden Town, Swiss Cottage and Kilburn High Road to contribute towards the supply of housing. This reflects the designation of housing as the priority land use of the Core Strategy (see policy CS6). Camden Development Policies policy DP1 contains further detail on the Council's approach to mixed use development. The Council's Site Allocations document will identify future development sites and provide guidance for their future development, including where mixed use development is appropriate.

## CS5. Managing the impact of growth and development

- 5.1 The overall approach of the Core Strategy, as set out in policy CS1, is to manage Camden's growth to make sure that its opportunities and benefits are delivered and sustainable development is achieved, while continuing to conserve and enhance the features that make Camden such an attractive place to live, work and visit. This flows from the Camden Community Strategy theme of a sustainable Camden that adapts to a growing population. Policy CS5 provides more information on our approach to managing the impact of growth in the borough.

### CS POLICY

#### CS5 – Managing the impact of growth and development

The Council will manage the impact of growth and development in Camden. We will ensure that development meets the full range of objectives of the Core Strategy and other Local Development Framework documents, with particular consideration given to:

- a) providing uses that meet the needs of Camden's population and contribute to the borough's London-wide role;
- b) providing the infrastructure and facilities needed to support Camden's population and those who work in and visit the borough;
- c) providing sustainable buildings and spaces of the highest quality; and
- d) protecting and enhancing our environment and heritage and the amenity and quality of life of local communities.

The Council will protect the amenity of Camden's residents and those working in and visiting the borough by:

- e) making sure that the impact of developments on their occupiers and neighbours is fully considered;
- f) seeking to ensure development contributes towards strong and successful communities by balancing the needs of development with the needs and characteristics of local areas and communities; and
- f) requiring mitigation measures where necessary.

#### **Making sure development achieves the objectives of the Core Strategy**

- 5.2 Central to managing Camden's future growth is the need to consider not just the scale and nature of that growth, but how it is provided and the effect on those who live in the area and the borough as a whole. All development in Camden, large or small, whether located in growth areas, highly accessible locations or in other parts of the borough, should take place in accordance with all relevant policies in the Core Strategy and the other documents that form part of Camden's Local Development Framework (see paragraph 4 in the Introduction) to ensure that the Council's vision for the borough is achieved. The Council will seek to ensure that the borough's growth brings benefits and opportunities to all.
- 5.3 The second section of this Core Strategy, *Meeting Camden's needs – Providing homes, jobs and facilities*, sets out our approach to providing the land uses, infrastructure and facilities that are needed to support Camden's communities, workers and visitors. This includes places to live, work and shop, community facilities and provision for walking, cycling and public transport. The section also sets out our approach to the unique issues faced in Central London, the home to many of the uses that contribute to London's role as a capital and major international city, as well as long-established residential communities.

- 5.4 One of the key elements of managing Camden’s growth is securing the infrastructure and services needed to support Camden’s growing numbers of residents, workers and visitors. To identify the infrastructure need in the borough in future years we commissioned the Camden Infrastructure Study 2009. This work formed the basis of the schedule in Appendix 1, which set out identified key infrastructure programmes and projects including transport, utilities, emergency services, education, health and other community facilities. It gives information on the nature of each infrastructure scheme, where it will be located, who will lead on its delivery and when it is expected to be provided. As the boundaries of the growth area are relatively tightly drawn, taking in the main development opportunities, the infrastructure to support a particular growth area may be provided outside its boundary. Please see section 19 – *Delivering and monitoring the Core Strategy* for more detail on our approach to infrastructure provision. In addition, the individual sections in the Core Strategy also contain details of infrastructure requirements and provision that are relevant to that section (for example, policy CS15 on open space and policy CS11 on transport.)
- 5.5 The third section of the Core Strategy, *A sustainable and attractive Camden – Tackling climate change and improving and protecting Camden’s environment and quality of life*, focuses on making sure that growth is sustainable and properly takes into account the character of Camden and the aspects of the borough that make it such an attractive place to live, work and visit. It sets out how we intend to make Camden a low carbon, low waste borough; deal with climate change; and protect, and where possible enhance, our built environment, heritage and open spaces. It also sets out our approach to improving the safety and health of the community.
- 5.6 Our Camden Development Policies Local Development Framework document will be one of the main mechanisms by which we will seek to deliver to vision and objectives in the Core Strategy. It sets out planning policies that provide more detail of our approach to many of the matters covered in this Core Strategy. We will use Camden Development Policies alongside the Core Strategy when we determine applications for planning permission.

### **Protecting amenity**

- 5.7 Camden’s high level of amenity – the features of a place that contribute to its attractiveness and comfort – is a major factor in the quality of life of the borough’s residents, workers and visitors and fundamental to Camden’s attractiveness and success. However, Camden’s inner London location, the close proximity of various uses and the presence of major roads and railways can mean that privacy, noise and light can be particular issues in the borough.
- 5.8 Protecting amenity is, therefore, a key part of successfully managing growth in Camden. We will expect development to avoid harmful effects on the amenity of existing and future occupiers and nearby properties or, where this is not possible, to take appropriate measures to minimise potential negative impacts. More detail and guidance on our approach to amenity is contained in Camden Development Policies policy DP26 – and our Camden Planning Guidance supplementary document. Other policies in Camden Development Policies also contribute to protecting amenity in the borough by setting out our detailed approach to specific issues, such as the impact of food, drink and entertainment uses (policy DP12), noise and vibration (policy DP28) and air quality (policy DP32)

### **Promoting successful communities**

- 5.9 A key element to our overall strategy of managing Camden’s future growth is to ensure that the opportunities and benefits of this growth are delivered in a way that meets the needs of Camden’s residents and promotes strong and successful communities. In assessing development proposals, the Council will take into account the needs and benefits of the development alongside the individual characteristics and needs of the local area and community, and will seek to strike a balance between them. Where relevant, we will take into account the cumulative impacts of developments, or particular types of development, on local areas and communities.

#### **Key evidence and references**

- Camden Together – Camden’s Sustainable Community Strategy; 2007-2012
- The London Plan (consolidated with alterations since 2004); Mayor of London; 2008

## CS7. Promoting Camden's centres and shops

- 7.1 Camden benefits from a wide variety of town and neighbourhood centres with different characters and roles, from Camden Town and its famous markets to upmarket Hampstead, from the furniture and electronics shops of Tottenham Court Road to the ethnic restaurants on Drummond Street. Our centres are of great importance to the life of the borough and those that live in, work in and visit it. As well as providing shopping and services and places of work and leisure, they are a focus of activity and community life and provide character and identity to local areas and the borough as a whole.
- 7.2 This section provides a planning framework to ensure that the vibrancy and vitality of Camden's centres is protected and enhanced. It sets out how the Council will integrate land use measures with environmental improvements, infrastructure delivery, partnership working and investment to protect and enhance the character and function of Camden's centres.
- 7.3 Other policies in this Core Strategy are also relevant to the Council's approach to Camden's centres. Policy CS1 identifies most of the borough's town centres as highly accessible areas that are considered to be particularly suitable locations for uses that are likely to lead to a significant increase in travel demand. It also promotes higher densities in these locations and encourages mixed use development in the most accessible centres in the borough, helping to promote mixed, vibrant centres. Policy CS3 provides more detail on these areas. Policy CS11 supports the provision of the transport infrastructure needed to support the continued viability of our centres.
- 7.4 Significant new development for a range of commercial uses is already in the pipeline in the King's Cross/St Pancras area, with a total of 20,000 square metres of additional A1 retail floorspace committed or provided through the development of the King's Cross growth area (outline planning permission granted for approximately 15,500 square metres) and the redevelopment of St Pancras Station (approximately 4,500 square metres). The Camden Retail Study 2008 indicates a need for around 27-31,000 square metres of new retail floorspace in the borough by 2026, in addition to that to be provided at King's Cross and St Pancras.

## CS7 – Promoting Camden’s centres and shops

### Distribution of retail across Camden

The Council will promote the following distribution of retail growth across the borough:

- a) in the range of 20,000 square metres net retail floorspace at King’s Cross/St Pancras;
- b) in the range of 20-30,000 square metres additional retail at Euston and Camden Town, with the majority expected to take place at Euston;
- c) additional provision as part of redevelopment schemes in the growth areas of Tottenham Court Road, Holborn and West Hampstead Interchange; and
- d) some provision in other town centres and Central London Frontages where opportunities emerge.

We will apply a sequential approach to retail and other town centre uses outside of these areas to support the following network of centres:

**Town centres:** Camden Town; Kilburn High Road; Finchley Road/Swiss Cottage; Kentish Town; West Hampstead; and Hampstead;

**Central London Frontages:** Tottenham Court Road/ Charing Cross Road/ New Oxford Street; High Holborn/ Kingsway and the main commercial area around King’s Cross;

**Neighbourhood centres:** located across the borough;

We will also support:

- limited provision of small shops outside centres to meet local needs; and
- appropriate retail provision in Camden’s **Specialist Shopping Areas:** Covent Garden; Hatton Garden, Museum Street, Drummond Street and Denmark Street.

### Protecting and enhancing Camden’s centres

The Council will promote successful and vibrant centres throughout the borough to serve the needs of residents, workers and visitors by:

- e) seeking to protect and enhance the role and unique character of each of Camden’s centres, ensuring that new development is of an appropriate scale and character for the centre in which it is located;
- f) providing for, and maintaining, a range of shops, services, food, drink and entertainment and other suitable uses to provide variety, vibrancy and choice;
- g) protecting and promoting small and independent shops, and resisting the loss of shops where this would cause harm to the character and function of a centre;
- h) making sure that food, drink and entertainment uses do not have a harmful impact on residents and the local area, and focusing such uses in Camden’s Central London Frontages, Town Centres and the King’s Cross Opportunity Area;
- i) supporting and protecting Camden’s local shops, markets and areas of specialist shopping; and
- j) pursuing the individual planning objectives for each centre, as set out below, including through the delivery of environmental, design, transport and public safety measures.

## Distribution of retail growth

- 7.5 We will focus new shopping (and related uses) in Camden’s designated growth areas and existing centres, having regard to the level of capacity available in these locations. The borough’s growth areas and town centres are shown on maps 1 – Key Diagram and 2 – Town Centres.
- 7.6 The growth area of King’s Cross will provide the major focus for new shop provision in Camden. The King’s Cross Central redevelopment will include shops, services and facilities of a scale similar to a town centre to meet the needs of the large numbers of people who will be living in, working in, or visiting the area. Planning permission has been granted for 45,000 sq m of retail, food and drink floorspace (in A use classes). This will be spread throughout the site and will open in phases. It is currently expected that 65% of the floorspace will be operating by 2016. In addition, substantial new retail has already been approved and built at nearby St Pancras Station (see paragraph 7.4 of this section).

### Map 2: Town Centres

This map is based on Ordnance Survey Material with the permission of Ordnance Survey on behalf of the Controller of Her Majesty's Stationery Office ©. Unauthorised reproduction infringes Crown copyright and may lead to prosecution or civil proceedings. Licence number LA100019726, year 2010.

- 7.7 The majority of retail growth above and beyond that at King's Cross and St Pancras will be delivered at Camden Town and Euston, which contain sites suitable for significant retail development. We consider that these locations have the capacity to accommodate in the order of 20-30,000 square metres of additional retail in total. However, the precise quantum and type of retail to be provided on these sites will be subject to detailed site specific assessments, and an assessment of any impacts on other centres. At Camden Town, Hawley Wharf provides an opportunity to deliver new retail floorspace, along with other mixed uses. There is also the opportunity to deliver a significant amount of additional retail floorspace as part of the redevelopment of Euston Station. This is expected to meet demand from people travelling through the station, as well as serving a local catchment, but should not cause harm to the vitality or viability of other nearby centres, including Drummond Street.
- 7.8 It is anticipated that much of the remaining retail requirement will be met through redevelopment in the growth areas of Tottenham Court Road, West Hampstead and Holborn. At Tottenham Court Road and Holborn the redevelopment of existing buildings will enable the provision of new retail, in particular at ground floor level. At West Hampstead, redevelopment should provide additional retail, which will be focused along West End Lane. Some new retail provision is also expected to be achieved in Camden's other town centres and Central London Frontages. Although the Camden Retail Study 2008 found that these other centres have limited opportunities for the provision of additional retail, redevelopment of existing buildings is likely to provide some increases in shop floorspace.
- 7.9 The Camden Site Allocations Local Development Framework document will identify sites that are expected to provide retail floorspace as part of redevelopment schemes.
- 7.10 In line with government Planning Policy Statement (PPS) 4, the Council will take a sequential approach when assessing proposals for new town centre uses (as defined in PPS4), ensuring that such development takes place in appropriate locations, having regard to the distribution of future retail growth established in Policy CS7 and the hierarchy of centres. Further guidance on the sequential approach is set out in Planning Policy Statement (PPS) 4 – *Planning for Sustainable Economic Growth*.

- 7.11 Policy CS7 establishes the hierarchy of centres within the borough. The role and function of Camden's centres varies greatly, reflecting the varied nature of the borough itself:
- Camden's Central London Frontages serve a similar function to town centres or have a London-wide or even national retail role, for example Tottenham Court Road;
  - Camden's town centres vary in terms of their size and role, the kind of shops and services they provide and in the distance people travel to them. While with some centres predominantly serve local needs (for example at Kilburn and Kentish Town), others also attract people from a much wider catchment (for example, Hampstead). Camden Town is a major tourist destination, including for international visitors. In addition to Camden's six town centres, Cricklewood neighbourhood centre forms part of a larger District Centre, with the majority of the centre located to the north of Camden within the boroughs of Barnet and Brent;
  - Camden's 36 neighbourhood centres provide for the day-to-day needs of people living, working and staying nearby (see Map 2 – Town Centres). Due to their relative size, Camden's neighbourhood centres are considered to be equivalent to local centres, as defined in PPS4 (Annex B);
  - Camden's individual, and groups of, specialist shops (for example, Museum Street and Covent Garden) contribute greatly to the variety and character of the borough. Whilst our Specialist Shopping Areas do not form part of our network of centres for the purposes of the sequential approach to new town centre development, we will support the provision of new retail in these centres;
  - A number of smaller shopping parades and individual shops also meet local needs for shopping, services and facilities.

## Protecting and enhancing Camden's centres

### Protecting and enhancing the character and role of Camden's centres

- 7.12 The development of new shops or other town centre uses, particularly when they are large in scale, can have an impact on other centres. In line with government guidance in Planning Policy Statement (PPS) 4 *Planning for Sustainable Economic Growth*, the Council will seek to protect the vibrancy and vitality of its centres by assessing the impact of proposed town centre uses (as defined in paragraph 7 of PPS4) on Camden's centres. The Council will require an impact assessment for large retail development proposals that are not in accordance with the approach in this Core Strategy and
- would be in an edge of centre or out of centre location, or
  - would be in an existing centre and have the potential to have a harmful impact on other centres.
- 7.13 Further guidance on assessing impact and information on relevant matters to be addressed in retail impact assessments is set out in PPS 4 and the accompanying *Practice guidance on need, impact and the sequential approach*.
- 7.14 The Council will ensure that development in its centres is appropriate to the character, size and role of the centre in which it is located (see below), and does not cause harm to neighbours, the local area or other centres. Shop and service uses (in use classes A1 and A2) and markets are considered suitable for all levels of centre.
- 7.15 The way centres look is an important factor in their character and the way they are perceived – Policy CS14 and policies DP24 and DP25 in Camden Development Policies set out our approach to seeking high design standards and preserving and enhancing Camden's heritage. A number of our centres lie wholly or partly within conservation areas (for example, Camden Town, Hampstead, West Hampstead and many neighbourhood centres), recognising their architectural and/or historical importance. Further information on these areas and guidelines on the Council's approach to protecting them and managing change is set out in individual conservation area statements, appraisals and management strategies. The design of shopfronts can contribute greatly to the character of centres and their distinctiveness. Our approach to shopfronts is set out in Camden Development Policies (policy DP30) and the Council's Camden Planning Guidance supplementary planning document.

### Ensuring a range of shops and other town centre uses

- 7.16 The success of a centre is strongly influenced by the variety and choice of shops, services and other uses within it. Policy DP12 in Camden Development Policies sets out more detail on our approach to protecting the character, function, vitality and viability of our centres through managing the mix of uses in them and ensuring that development does not cause harm to a centre, to its neighbours or to the local area. Camden has used a range of information sources, including the Camden Retail Study 2008 and comments from local residents and businesses to establish what our approach should be for each centre. The centre specific planning objectives set out below provide objectives for each of Camden’s centres, and address the mix of retail and non-retail uses sought. Tourist uses such as hotels and employment generating uses such as offices can make an important contribution to the economic success of town centres – our approach to these uses is set out in policy CS8 and policies DP13 and DP14 of Camden Development Policies. Community and cultural uses add to the vitality and vibrancy of Camden’s centres by adding to the diversity of uses in an area, and the variety of activities that take place at different times of the day. Camden’s approach to these uses is set out in Core Strategy policy CS10 and Development Policy DP15.
- 7.17 Small and independent shops contribute to the character and diversity of Camden’s centres by adding to the choice and variety of shopping facilities available, and avoiding centres being dominated by national multiple retailers. The contribution of small and independent shops to the character and attractiveness of many of Camden’s centres is highlighted in the Camden Retail Study. The Council will seek to promote the provision of small units where appropriate and independent shops where possible. We will also seek to protect shops, including those on small shopping parades, where their loss would cause harm to a centre or local area. Our detailed approach to protecting shops and promoting small and independent businesses is set out in Camden Development Policies (policy DP10).

### Minimising the impact of food, drink and entertainment uses

- 7.18 Food, drink and entertainment uses add to the diversity and vibrancy of Camden’s centres and bring activity to them outside normal shopping hours. This includes the borough’s rich culture of live music, dance and theatre, as well as restaurants and bars. These uses are important to the borough socially, culturally and economically, and contribute to Camden’s image as a vibrant and attractive place. However, local residents can be affected by disturbance and anti-social behaviour associated with some of the people visiting such premises, particularly premises serving alcohol. The dense, mixed-use nature of much of the borough, means that it is particularly important that town centre uses such as food, drink and entertainment uses are managed so that they do not cause harm to surrounding communities and the local environment. The Council wants to see the borough continue to be a successful location for food, drink and entertainment uses while making sure that the quality of life of local people, workers and visitors is not harmed. Policy DP12 in Camden Development Policies sets out more detailed information regarding the Council’s approach to managing the impact of food, drink, entertainment and other town centre uses.

- 7.19 Food, drink and entertainment uses, such as restaurants, pubs and bars, music venues, cafés and hot food take-aways, are most appropriately located in commercial areas to minimise their impact on the amenity of local residents. Town centres and Central London Frontages are considered the most suitable locations for such uses. Some food, drink and entertainment premises will also be provided in Camden's growth areas, in particular at King's Cross. The Council wishes to see a range of such uses for all age groups within its centres, not just those that primarily involve drinking.
- 7.20 The Council recognises that individual small-scale food and drink uses outside larger centres can be important local facilities, reducing the need to travel and providing community meeting places. It therefore considers that neighbourhood centres are suitable for small-scale food and drink uses (generally less than 100 square metres) which serve a local catchment, provided they do not cause harm to the surrounding area or residents.
- 7.21 The Council's responsibilities as a licensing authority, separate to its planning functions, gives it additional influence on premises that sell alcohol and/or provide regulated entertainment or late-night refreshment. The Council's approach to licensing is set out in Camden's Statement of Licensing Policy. See also Policy CS17 – *Making Camden a safer place*.
- 7.22 The Council has also produced a series of area planning documents (for Camden Town, Central London, West Hampstead and Finchley Road/Swiss Cottage) which give more detailed guidance on how the Council will treat planning applications for shops, food, drink and entertainment uses in particular centres, taking into account their specific circumstances.

### **Camden's markets and areas of specialist shopping**

- 7.23 Camden is well served by markets, ranging from street markets such as Inverness Street, Chalton Street, Leather Lane and Queens Crescent to the world famous Camden Town markets (e.g. the Stables and Camden Lock markets). Markets add greatly to the variety, interest and attraction of shopping in the borough and are a source of local employment, often providing more flexible and casual work opportunities. Street markets can be an important source of fresh food, often grown more locally than food from supermarkets. They can also help to meet the specialist food needs of ethnic communities; black and minority ethnic groups tend to make significantly more use of local markets than the general population.
- 7.24 It is important that markets are carefully managed to prevent any potential negative impacts such as congestion and litter. The Camden Development Policies document sets out detail on the Council's approach to planning applications involving markets (see policy DP11).
- 7.25 Camden has a number of areas which provide specialist shopping, drawing people from beyond Camden and often from beyond London. These include the area around Museum Street for antiquarian books, prints and coins; Hatton Garden for jewellery; Denmark Street for music; Charing Cross Road for books; Tottenham Court Road for furniture and electronics; Drummond Street for ethnic Asian shops and restaurants; and parts of Covent Garden and Camden Town for fashion. Like markets, these specialist shopping areas help to provide variety and individuality that is in contrast to the more standard range of shops found in many centres.
- 7.26 The Council aims to support and protect these areas, which make a great contribution towards the attractiveness and diversity of the borough. Camden's specialist shopping areas fall within Central London and Camden Town, for which we have produced specific area guidance. These recognise the role of our specialist shopping areas and, although councils have limited powers to protect specific retail uses, use the influence available to support and encourage them; for example, by restricting changes from shops (in use class A1) to other uses to maintain a stock of suitable premises.

### **Centre-specific planning objectives**

- 7.27 Each of Camden's centres has its own character and role. These are described below, alongside the Council's objectives for each centre. The Council will expect development in our centres to reflect the character and role of the centre in which it is located, and meet our stated objectives for that centre.

- 7.28 The Council and its partners undertake a range of work to improve and support our centres. This includes improvements to the street environment and transport provision and measures to improve public safety and prevent crime and anti-social behaviour. Policy CS11 – *Promoting sustainable and efficient travel* and Appendix 1 – *Key infrastructure programmes and projects* (items 39-50, 55 and 56) give details of the delivery of the transport infrastructure improvements and public space enhancements that will benefit and support our town centres and Central London. These improvements will play a crucial role in helping to deliver our centre-specific objectives.
- 7.29 The way that town centres are managed can have an important impact on the success of a centre. The Council is currently in the process of reviewing its Town Centre Management Strategy, and is setting up appropriate management structures in order to pursue continued improvements to its centres. Town centre management will play an important role in taking forward the Council's objectives for each of its centres.

## Centre specific planning objectives

### Camden Town

Camden Town is a vibrant centre, internationally famous for its unique markets, independent fashion and its music and entertainment venues such as the Roundhouse and Koko. It is also home to many residents and to numerous businesses, small and large, notably media, cultural and creative industries, attracted by the area's unique atmosphere. Camden Town is the borough's biggest centre with the largest range of shops and services, and is designated as a Major Centre in the London Plan. The centre does not have a single character but broadly contains three parts – the commercial heart in the markets and around Camden Town tube station; the southern section which provides more traditional 'high street' shopping and serves a more local role; and Chalk Farm Road to the north with its mixed street frontage of restaurants, bars and specialist shops. A cluster of creative industries in the areas around Camden High Street also adds to the centre's vibrancy. The Camden Retail Study 2008 found that there is demand for the expansion of shop chains into the market area, which could drive up rents and threaten the traders in smaller shop units that provide much of Camden Town's attraction as a shopping destination.

Although Camden Town is a successful centre, it faces challenges in terms of crime and anti-social behaviour. The centre is recognised as a priority for the Council and its partners in Camden's Community Strategy. The challenge is to make Camden Town a successful and safe place with something for local people and visitors of all ages, without losing important aspects of its unique character.

The Council's approach to supporting and promoting the success of Camden Town will include:

- **improving the street environment and pedestrian movement, and reducing negative traffic impacts generated along Camden High Street.** The Council has a programme of works to improve streets and spaces in Camden Town. Camden Town Unlimited have produced *Camden Town First – Streets, Spaces and Places – A Vision for Change* which sets out the business community's aims for improving Camden Town's environment. We will also continue to seek improvements to Regent's Canal, which contributes to the unique character and setting of the centre;
- **making Camden Town feel safer through community safety measures.** We will continue to work with the police and other agencies to reduce the overall crime rate in Camden Town. Camden's Community Safety Partnership Strategy, *Camden Safe*, sets out specific targets and actions to reduce crime and anti-social behaviour in the area. All development should include appropriate design measures to prevent crime and anti-social behaviour;
- **seeking to protect the special character and attractiveness of Camden Town by pursuing the continued provision of small shop units.** Development schemes in the upper part of Camden High Street/markets area (north of Inverness Street and south of the railway bridge) will be expected to provide small shop units consistent with this part of the centre, which is characterised by small ground floor premises. Larger units in this location would be harmful to the character and diversity of Camden Town, and to the viability of small, independent traders. As a guide, units larger than 100 sq m will not be permitted in this part of the centre. Larger shop units will be supported in the southern part of Camden High Street;
- **supporting and promoting the creative industries sector in Camden Town.** Camden Town has significant opportunities to develop its creative industries, given the large number of existing media, cultural and other creative businesses that are clustered around Camden High Street, and opportunities resulting from the nearby redevelopment and transport improvements at King's Cross. We will seek to enable the growth of this sector by: supporting the provision of new, high quality offices, studios, workshops and other premises, and working in partnership with Camden Town Unlimited, to actively support, promote and attract creative industries to the area;

- **managing the balance of retail and leisure uses.** The Council will continue to ensure that the majority of uses on the southern part of Camden Town (south of the Jamestown Road) are in retail use, whilst allowing for more equal balance between retail and non-retail uses to the north, as set out in our Revised Planning Guidance for Camden Town supplementary document. The Council will welcome uses that add to the centre's choice of facilities and attractions for people of different ages;
- **ensuring that Camden has a well-managed night time economy.** Our planning guidance for Camden Town aims to manage the location and concentration of food, drink and entertainment uses, particularly those which operate late into the evening, so they enhance the area through their contribution to its attraction and vibrancy and do not cause harm to the quality of life of local people or the character of the area and its other uses and activities. The Council's Statement of Licensing Policy contains special policies on the cumulative impact of these uses in Camden Town that restrict new premises licences and new club premises certificates;
- **retaining the special built character of Camden Town by promoting high quality design** of buildings, shopfronts, signage etc that reflects the scale and character of Camden Town centre. The Council has produced Conservation Area Appraisals and Management Strategies for the Camden Town conservation area and the Regent's Canal conservation area, which includes part of Chalk Farm Road. We will take these into account when assessing planning applications for sites in the area. We will seek to retain the distinctive and varied character of the area's heritage assets such as conservation areas and will expect new development to contribute positively to them;
- **promoting and protecting Camden Town's markets.** Camden's markets (Camden Lock, Stables, Canal, Inverness Street and Camden (Buck Street) markets) are a fundamental element in the success and vitality of Camden town centre as well as being an important tourist attraction. Please see above and the Camden Development Policies (policy DP11) for further information on our approach to markets;
- **supporting transport improvements,** in particular improvements to Camden Town Underground Station, and changes to traffic circulation; and
- **identifying development opportunities.** Camden Site Allocations will set out the Council's approach to major development sites in the borough to help deliver the objectives of the Core Strategy and will include sites within Camden Town.

## Kilburn High Road

Kilburn High Road straddles the border of Camden and Brent, and is the second largest centre in the borough. It has a large number of small, independent shops and relatively few national chain stores. Although it is designated as a major centre in the London Plan, the centre mostly serves the day-to-day needs of the local population. The Camden Retail Study 2008 found that the economic performance of Kilburn has improved. It also found that the area's evening economy is strong, in particular to the northern end of the High Road, which contains a range of cultural and leisure uses. This is a continuation of Kilburn's historical role as a meeting place and destination for music and other cultural purposes. The southern end of Kilburn High Road has benefited from a number of mixed developments in recent years.

The Council considers that Kilburn will continue its current role serving a predominantly local catchment, while seeking to enable the High Road to take better advantage of its relatively affluent local population, and improving the overall balance and quality of retail available. The Council will continue to work with its partners, in particular the London Borough of Brent and the police, to make the town centre cleaner, safer and more successful.

As there are limited development opportunities on the Camden side of Kilburn High Road, the Council will focus on improving what already exists. A number of ways in which improvements can be achieved go beyond the scope of town planning and relate to management and partnership working; for example, more high quality shop frontages to increase the quality and attractiveness of the centre. The Council work with its partners to investigate providing funding and advice to shop owners to pursue these improvements.

The Council will:

- enhance the street and public spaces through the delivery of further improvement projects in order to make Kilburn High Road a more attractive centre. Where possible, the area's history and heritage should be used to inform the design of schemes to reinforce Kilburn's identity;
- seek to make the High Road a diverse and vibrant centre that takes advantage of its strengths. We will place an emphasis on three 'zones': a shopping core to the centre; a mixed use, cultural zone to the north; and a mixed use zone to the south of Kilburn High Road station. We will focus shopping provision in the core of the centre and allow a wider range of other uses elsewhere – see our Camden Planning Guidance supplementary planning document for more detail on our approach;
- seek the provision of larger units as part of development proposals in the core of the centre, in order to attract a wider range of retailers to the area;
- enhance the character and quality of the 'cultural zone' to the north of the High Road, consolidating and building on the success and attractiveness of existing uses, such as the Tricycle Theatre, music and comedy venues and the range of diverse shops, restaurants, cafes and pubs; and
- improve safety and the perception of safety in Kilburn High Road by requiring development to include appropriate design measures to prevent crime and anti-social behaviour.

## Finchley Road/Swiss Cottage

The main shopping area of Finchley Road/Swiss Cottage runs from the O2 Centre, with its concentration of food, drink and entertainment uses, to Swiss Cottage Underground Station, while the refurbished Swiss Cottage Leisure Centre and the listed Swiss Cottage Library provide a focus to the south. The centre runs either side of the busy A41 Finchley Road (managed by Transport for London), which creates a barrier between the two sides of the centre, restricting pedestrian movement and creating a poor environment for visitors. Finchley Road/ Swiss Cottage town centre generally serves the local population, a role which is expected to continue. We have expanded the town centre boundary to include Swiss Cottage Library and Leisure Centre and the Hampstead Theatre (see Map 16), which provide a focus for the south of the centre.

The Council will:

- support the core shopping area and manage the location, concentration and impact of food, drink and entertainment uses in line with the Council's Planning Guidance for Finchley Road/Swiss Cottage in order to protect the character of the centre and the amenity of neighbouring residents;
- work with TfL to improve pedestrian links across Finchley Road, and to assess long term opportunities to reduce traffic impacts along the road, including the possible removal of the one way traffic gyratory;
- promote enhancements to the local environment. We will work with TfL to assess how further pedestrian improvements could be delivered for the centre, including works to improve the public area around Swiss Cottage station; and
- improve 'gateways' into the Centre from key side streets to the west and east of Finchley Road, as proposed in the Camden Local Implementation Plan 2005/06-2010/11.

## West Hampstead

West Hampstead centre provides for local people's day-to-day needs for convenience and comparison shopping. It is highly accessible by public transport, with three stations (Thameslink, London Underground and London Overground). West Hampstead Interchange is identified as a growth area in this Core Strategy and the London Plan (see policy CS1 above – Distribution of growth). The extent of the growth area differs from that of the town centre, although the two intersect along West End Lane, between Broadhurst Gardens and the Thameslink station.

The northern end of the centre lies within the West End Green/Parsifal Road Conservation Area and has a high quality environment with a 'village' character. The southern end of the centre around the stations is less attractive and has a poor quality pedestrian environment, although the southernmost part of the centre is in the Swiss Cottage Conservation Area. West Hampstead has relatively high proportions of convenience (food), retail and A3 (restaurants and cafes) uses, many of which are independent.

The Council will seek to ensure that West Hampstead continues to provide a mix of uses to serve the local area, but will avoid further loss of ground floor retail uses. We will:

- work with Transport for London and other partners to improve interchange between rail, underground and bus services and improve the ease of pedestrian movement in the area (see CS11 – *Promoting sustainable and efficient travel*);
- seek to improve the street environment south of West End Green, in particular, to enhance the street scene around the transport interchange area between Broadhurst Gardens and the Thameslink station;
- ensure that development around the interchange provides an appropriate mix of uses and contributes towards improved interchange facilities and a high quality street environment (see CS1 – *Distribution of growth*);
- seek to control the location and concentration of food, drink and entertainment uses in West Hampstead town centre to ensure that they do not cause harm to residents or the character and retail function of the centre by applying the guidance set out in the Council's Supplementary Planning Document for West Hampstead; and
- make sure that development conserves or enhances the special character and appearance of West Hampstead by applying the guidance in the conservation area statements for the area.

## Kentish Town

Kentish Town centre provides shopping and service uses for the local area. The Camden Retail Study 2008 found that Kentish Town has a good range of shops and services for a centre of its size, with many independent traders, and a significant amount of food and drink uses.

Although the centre has recently been subject to improvements to the street environment and pedestrian movement, it remains congested for much of the day, bringing noise and pollution impacts for users of the centre.

The Council will:

- support the character and retail role of Kentish Town by managing the proportions of non-retail premises, in line with the approach set out in the Council's Camden Planning Guidance supplementary planning document;
- deliver further street and public space improvements to enhance conditions for pedestrians and reduce the impact of traffic on the centre, including changes to traffic signals, further pedestrian crossing improvements and new local squares; and
- improve the canopy area next to Kentish Town train station, and investigate the possibility of access via a bridge from the canopy area to Kentish Town Overground Station.

Around £500,000 has been secured from TfL to complete the proposals set out above, which form part of the five-year £4 million *Improving Kentish Town* project which is currently being delivered by the Council.

## Hampstead

Although one of the smallest of Camden's centres, Hampstead draws more people from outside the borough than any town centre after Camden Town. Visitors are attracted to the area by its high quality environment, 'village' feel and upmarket shops, cafes and bars. The whole centre is within the Hampstead conservation area and includes many listed buildings, recognising its special character and architectural and historic importance. Opportunities to expand Hampstead centre are limited by environmental constraints and a lack of potential development sites.

The Council will focus on protecting Hampstead's current special character, attractiveness and success as a centre, enabling the centre to continue its role as a retail and leisure destination serving a wide catchment area, as well as the needs of the local population. In order to pursue these aims, the Council will:

- expect development in Hampstead to be of the highest quality design and be sensitive to the area's unique character and heritage assets. Development should be consistent with the Council's Hampstead conservation area statement;
- expect proposals for new or altered shopfronts to preserve or enhance the character and appearance of the centre and respect the original frontages;
- deliver small scale street and public space improvements to enhance conditions for pedestrians, where needed; and
- focus shopping provision in the core of the centre by managing the proportions of non-retail uses – see the Council's Camden Planning Guidance supplementary planning document for more detail on our approach.

## Central London Frontages

Central London contains a number of shopping and service areas as part of its diverse mix of uses. These range from larger areas predominantly serving workers and visitors to neighbourhood centres serving local residents to areas of specialist shopping. The main shopping streets in Camden's Central London area have been designated as Central London Frontages. The Council's approach to these areas is set out below.

The Council's Planning Guidance for Central London supplementary document provides detailed information on our approach to food, drink, entertainment, specialist and retail uses in Central London. We will take this into account when assessing relevant planning applications in the area. Core Strategy Policy CS11 (Promoting sustainable and efficient travel) sets out in brief how the Council will improve public spaces across Central London. The Council will deliver improved pedestrian environment and signage along key routes, enhancing links between Camden's Central London area with the rest of the West End, and with key transport hubs, including King's Cross, St Pancras and Euston stations.

## Tottenham Court Road/Charing Cross Road

This Central London Frontage operates as an extension to the West End and therefore attracts people from throughout London as well as visitors to the capital. It covers Tottenham Court Road, part of New Oxford Street, and the eastern side of Charing Cross Road as far as Cambridge Circus (the western side of Charing Cross Road falls within the City of Westminster). Tottenham Court Road and part of New Oxford Street lie within the West End Retail Special Policy Area designated in the London Plan.

Tottenham Court Road is well-known for its concentration of furniture and electrical goods stores and the Camden Retail Study 2008 found that it was performing well. The area around Tottenham Court Road Station is identified as a growth area in this Core Strategy and the London Plan. Policies CS1 – *Distribution of growth* and CS2 – *Growth areas* set out the Council's approach to development in the area.

Charing Cross Road also has a specialist retail role, with many book and music shops. The Camden Retail Study highlights the need to improve the pedestrian environment at Charing Cross, particularly towards its northern end.

The Council considers that Tottenham Court Road and Charing Cross Road are both likely to continue in their existing specialist retail roles, but considers that significant improvements to the pedestrian environment will be required to address current accessibility issues and to support increased pedestrian flow as a result of growth and the arrival of Crossrail. This will be particularly important at St Giles Circus, given its key location at the junction of Oxford Street and Tottenham Court Road, and its proximity to Tottenham Court Road station.

The Council will:

- promote and preserve the specialist retail character of Tottenham Court Road and Charing Cross Road by managing the level of shop and food, drink and entertainment uses in these areas, in line with the approach set out in our Planning Guidance for Central London supplementary planning document;
- support the expansion of the Central London Frontage and new retail uses along New Oxford Street, where this would not cause harm to residential amenity. Additional retail growth along the Central London Frontage will be achieved through redevelopment and refurbishment of existing premises;
- pursue significant improvements to the local pedestrian environment, including at St Giles Circus;
- work with Transport for London to investigate opportunities to turn Tottenham Court Road into a two-way road; and
- expect development to include appropriate measures to prevent crime and anti-social behaviour.

## Holborn

This comprises the shopping streets of High Holborn/Holborn (from the junction of New Oxford Street to Holborn Circus), and most of Kingsway south of High Holborn. It primarily operates as a town centre for local workers and businesses, with a mix of comparison and convenience stores, banks and building societies, sandwich shops and other food and drink uses. The Holborn area is largely characterised by offices, and large office entrances often break up the frontage. Holborn is identified as a growth area in this Core Strategy and the London Plan. Details of the Council’s approach to development in the area are set out in policies CS1 – *Distribution of growth* and CS2 – *Growth areas*.

The Council will seek to increase the availability of ground floor retail uses at Holborn in order to create more active public spaces and a more cohesive local shopping and service area. The Council will:

- promote the shopping and service character of Holborn Central London Frontage by managing the level of shop and food, drink and entertainment premises in the area, in line with the approach set out in our Planning Guidance for Central London supplementary document;
- manage the night time economy using the Council’s Planning Guidance for Central London supplementary document. In addition, the Council’s Statement of Licensing Policy contains special policies on the cumulative impact of these uses in Holborn, which restrict new premises licences and new club premises certificates;
- expect the provision at ground floor level of new shop premises, or other appropriate uses, as part of the redevelopment of properties that do not currently contribute to the shopping and service character of the Frontage;
- improve pedestrian linkages with the West End through street enhancements;
- work with Transport for London to investigate opportunities to improve or change the gyratory system; and
- expect development to include appropriate measures to prevent crime and anti-social behaviour.

## King's Cross/Euston Road

This Central London Frontage is the main commercial area around King's Cross, including parts of Euston Road, King's Cross Road and Grays Inn Road. Active ground floor uses along these roads are not continuous, but are broken up by large uses such as King's Cross and St Pancras stations, the British Library and Camden Town Hall. The eastern and western parts of this Central London Frontage have different characteristics. The eastern part is characterised by small or medium scale buildings with a mix of commercial uses on the ground floor serving local residents, workers and travellers, with residential, hotel and office accommodation above. Pressure for additional food and drink uses here has generally been resisted in order to preserve the character and function of this area, and to prevent unacceptable cumulative impacts. The western part mainly consists of large office and hotel buildings. The ground floors of many of these buildings contain shops or food and drink uses which serve the local worker and hotel populations.

King's Cross and Euston are identified as growth areas in this Core Strategy (see Policy CS1 – *Distribution of growth*) and the London Plan. However, the growth areas are geographically separate to the King's Cross/ Euston Road Central London Frontage (see Map 2). The Council will work with its partners to ensure that growth contributes to improving the quality of the shopping environment along the frontage, particularly at the eastern end, reflecting its position as a gateway to London and a key new business area.

The Council will:

- resist proposals for further loss of retail uses or for additional food, drink and entertainment uses in the eastern part of this Central London Frontage in order to protect the retail role of the frontage and to prevent unacceptable cumulative impacts. The exception to this is the block bounded by Pentonville Road, King's Cross Bridge and St Chad's Place, where there is currently no housing and redevelopment may provide opportunities for food, drink and entertainment activities, as well as retail space;
- encourage the introduction of active ground floor uses, such as shops and other appropriate uses, as part of the redevelopment of existing buildings that currently do not have an active ground floor use;
- permit additional food, drink and entertainment uses in the western part of the Frontage provided that they do not undermine the area's retail function and the mix of uses in the area, in line with the approach set out in Camden's Planning Guidance for Central London supplementary document;
- expect development to include appropriate design measures to prevent crime and anti-social behaviour, in order to make King's Cross and Euston feel safer; and
- seek to improve the street scene along the frontage, particularly at the eastern end, including working with TfL to identify opportunities to enhance the pedestrian environment and crossing opportunities along Euston Road and Pentonville Road.

## Neighbourhood Centres

Camden has over 30 neighbourhood centres which cater for the day-to-day shopping and service needs of their local populations. They contain a range of uses including shops, food and drinks uses, doctor's and dentist's surgeries and financial and professional services, and often have housing on upper floors. Housing is the Council's preferred use above ground floor level in neighbourhood centres and we will promote the residential use of vacant or underused floors. Commercial and community uses are considered acceptable uses of upper floors providing they do not cause harm to the amenity of existing residents or introduce activity that would prejudice future residential use on other levels or in neighbouring properties.

The Council will seek to retain a strong element of convenience shopping for local residents in Camden's neighbourhood centres and ensure that any development in them does not harm the function, character or success of that centre. We will take into account the individual character of the centre when assessing development proposals but, as a guide, we will resist schemes that would result in less than half of ground floor premises in a neighbourhood centre from being in retail use or in more than three consecutive premises being in non-retail use. We will also take into account any history of vacancy in shop units and the prospect of achieving an alternative occupier for vacant premises.

Applications for food, drink and entertainment uses will be carefully assessed to minimise the impact on local residents and the local area (see above). The Camden Development Policies document contains the Council's detailed policies to manage the impact of food, drink and entertainment uses (see policy DP12).

## CS9. Achieving a successful Central London

9.1 The southern part of Camden plays an important part in providing the vibrancy, diversity and identity that makes the borough such a popular place to visit and live in. It forms part of Central London whose unique role, character and mix of uses provides much of the capital's distinctiveness. Camden's Central London area:

- is a key part of the nation's capital and a major international city;
- is part of London's Central Activities Zone (CAZ) – see below;
- has a significant residential population adding to its life and diversity and supporting economic and other functions;
- has a concentration of nationally important medical, research and higher education institutions;
- is a major business and employment centre and the main focus of Camden's economy. It contains a significant proportion of the borough's office floorspace, a variety of shopping areas, from neighbourhood centres to specialist retail locations like Covent Garden, and is home to many other uses, including legal, health and professional services; food, drink and entertainment and cultural and tourism uses;
- contains many areas with their own characters and identities – e.g. Fitzrovia, Museum Street area, Hatton Garden and Covent Garden – and many places with a high quality and/or historic environment, for example, conservation areas, listed buildings and London Squares; and
- has excellent public transport links to the rest of London and the UK and routes to mainland Europe.

The extent of Camden's Central London Area is shown in Map 17 in Appendix 6. This area forms part of the Central Activities Zone (CAZ) designated in the London Plan, which extends across nine boroughs. The Central Activities Zone is the core of the capital with a unique cluster of activities contributing to London's role as a 'world city'.

9.2 Central London will experience much of the growth identified for Camden in future years, concentrated in the growth areas of King's Cross, Euston, Tottenham Court Road and Holborn. In addition, due to its high level of accessibility other parts of central London may be considered to be a suitable location for uses which attract a large number of journeys. Please see policy CS2 for our approach to growth areas and CS3 on other highly accessible areas. Policy CS9 sets out our approach to the unique pressures and challenges faced by Central London and how we will manage growth in the area to ensure it brings benefits to the borough and beyond and protects and enhances the factors that make a popular place to live, visit and do business.

9.3 The challenges facing Central London include managing significant development pressures to ensure that development in growth areas and other locations links with and supports existing communities, and ensuring that its variety of uses can operate and thrive without causing harm to each other. To maintain the character and vibrancy that is provided by Central London's residential communities, there is a need to continue to provide a range of homes including affordable housing, and necessary community facilities and open space. Road and public transport congestion, air quality, noise, the quality of streets and spaces, the management of the night time economy and reducing opportunities for crime and anti-social behaviour are also important issues in this part of the borough.

## CS9 – Achieving a successful Central London

The Council will support and promote the Central London area of Camden as a successful and vibrant part of the capital to live in, work in and visit. We will:

- a) recognise its unique role, character and challenges;
- b) support Central London as a focus for Camden's future growth in homes, offices, hotels, shops and other uses;
- c) seek to ensure that development in Central London, in the growth areas of King's Cross, Euston, Tottenham Court Road and Holborn and beyond, contributes to London's economic, social and cultural role while meeting the needs of local residents and respecting their quality of life;
- d) support residential communities within Central London by protecting amenity and supporting community facilities;
- e) seek to secure additional housing and affordable homes, including as part of appropriate mixed use developments;
- f) take into account the specific identity of the areas within Central London when taking decisions on planning applications and in relevant initiatives and works;
- g) promote and protect areas of specialist activity, such as the Museum Street area and Hatton Garden;
- h) support the concentration of medical, educational, cultural and research institutions within central London;
- i) preserve and enhance the area's historic environment;
- j) seek to improve the quality of the area's streets and places, the connections between them and the ease of movement into, and through, the area;
- k) continue to designate Central London as a Clear Zone Region to reduce congestion, promote walking and cycling and improve air quality;
- l) promote improved community safety;
- m) manage the location and concentration of food, drink and entertainment uses and their impact;
- n) allocate sites within Central London for appropriate uses, including offices and housing, in the Camden Site Allocations document.

- 9.4 The Council will seek to promote a successful Central London area while achieving a balance between the interests of its residents and the area's economic, social and cultural use and roles. As Central London experiences the most intense development pressures in the borough and contains a diverse and dense mix of uses, including a significant residential community, the need to ensure that development supports the continued success of the area but does not cause harm to its neighbours is particularly acute in this part of the borough (please see policy CS5 and policy DP26 – *Managing the impact of development on occupiers and neighbours* in Camden Development Policies).
- 9.5 Central London is the location of most of Camden's growth areas (King's Cross, Euston, Tottenham Court Road, Holborn). Development in these areas, and throughout Central London, should contribute to the area economically, socially and environmentally, through providing a substantial number of new jobs and space for businesses; supporting community facilities; protecting and improving the amenity of local residents; being of high quality design and by contributing to improving open space. Camden's Central London area will continue to be the borough's economic focus, contributing to the success of the Central Activities Zone (CAZ) and London's role as a major global city, and providing the majority of jobs in Camden. This Core Strategy identifies Central London as the focus of the majority of future office and retail development in the borough over the next 15 years, with King's Cross the location of a substantial proportion of this growth (please see policies CS8 – *Promoting a successful and inclusive Camden economy* and CS7 – *Promoting Camden's centres and shops*).

- 9.6 Camden's Central London area is a major draw for Londoners and for tourists visiting the city, making a significant contribution to the attractiveness and economy of both the borough and the capital. Attractions include the British Museum, Covent Garden, Hatton Garden and numerous theatres, bars and restaurants. These are also used by Camden residents and are therefore important local facilities. Central London is considered an appropriate location for facilities that attract large numbers of visitors; however, it is important that these do not harm to local character or amenity or cause congestion. (See policies CS1 – *Distribution of growth*, policy CS2 – *Growth areas*, CS3 – *Other highly accessible areas* and Camden Development Policies policy DP14 – *Tourism development and visitor accommodation*).
- 9.7 Policy CS7 – *Promoting Camden's centres and shops* (supported by policy DP12 in Camden Development Policies) seeks to make sure that new food, drink and entertainment uses do not cause harm to our centres, the local area or the amenity of residents. This is a particular issue in Covent Garden and other parts of Central London. Within Covent Garden and the Charing Cross Road area, new entertainment uses will only be allowed where they are small in scale, have a low impact and will not result in an increased concentration of late night uses. The Council has produced area-specific Planning Guidance for Central London which seeks to manage the location and concentration of food, drink and entertainment uses, particularly those which operate late into the evening, so they contribute to Central London's vibrancy in a way that does not harm the quality of life of local people, the character of the area or other uses or activities. It gives detailed guidance on how the Council will consider the potential impacts of proposals for food, drink and entertainment uses and protect the amenity of residents. In addition, Camden's Statement of Licensing Policy 2008 recognises the concentration of licensed premises in the Seven Dials area of Covent Garden and identifies it as an area subject to special policies on cumulative impact, with a presumption against applications for new premises licences and new club premises certificates.

- 9.8 In addition to providing detailed, locally specific guidance on food, drink and entertainment uses, our Planning Guidance for Central London supplementary document also makes wider recognition of the challenges and pressures experienced in the area. The Guidance recognises that the local areas within Central London, and their residential communities, have different characteristics and pressures. For each local area, it identifies specific issues and provides guidance on how the Council will seek to manage competing interests so that development does not cause harm to the character of the area or the amenity of local residents. The Council will take into account Planning Guidance for Central London when making decisions on planning applications in the area.
- 9.9 There are many conservation areas in Camden's Central London area (Bloomsbury, Charlotte Street, Denmark Street, Hatton Garden, King's Cross, Seven Dials and parts of Regent's Canal and Regent's Park), covering the majority of the area, as well as number of historic London Squares and many listed buildings. This illustrates the high quality of much of the area's built environment and reflects its historical and architectural importance. The Council will take the conservation area statements, appraisals and management strategies for these areas into account when assessing planning applications for sites in the area. We will seek to make sure that the design of new development contributes positively to the area and respects Central London's full range of heritage assets.
- 9.10 The Council is undertaking many schemes to encourage walking and cycling in Central London and improve its street environment. For example, we work jointly with Westminster and the City of London in the Clear Zone Partnership, which covers the Central London area (see policies CS14 – *Promoting high quality places and conserving our heritage* and policy DP32 – *Air quality and Camden's Clear Zone* in Camden Development Policies). Works in the area include physical improvements to make streets more pedestrian and cycle friendly; enhancing historic streets by improving paving and lighting; and better signage to help pedestrians find their way around the area.
- 9.11 The Camden Site Allocations document will identify the main development opportunities in Central London and set the framework for their development. More detail on our approach to a number of the issues mentioned above is set out in the Camden Development Policies document.

# Providing jobs and facilities

## DP10. Helping and promoting small and independent shops

- 10.1 Small shops, often run by independent traders and providing specialist shopping, help to sustain the diversity, vibrancy and character of our centres and smaller shopping areas and provide suitable premises for local businesses. However, they are threatened by the continuing trend towards fewer, larger shops. Many residents have expressed support for measures to encourage small shops and initiatives to encourage and promote retail diversity and entrepreneurialism in the borough.
- 10.2 The Council's strategy for promoting town centres and shops, set out in Camden Core Strategy Policy CS7 – *Promoting Camden's centres and shops*, includes resisting the loss of shops where this would cause harm to the character or function of a centre, and seeking to protect small and independent shops. Policy DP10 sets out our detailed approach on small and independent shops.

### DP POLICY

#### DP10 – Helping and promoting small and independent shops

The Council will encourage the provision of small shop premises suitable for small and independent businesses by:

- a) expecting large retail developments to include a proportion of smaller units;
- b) attaching conditions to planning permissions for retail developments to remove their ability to combine units into larger premises, where appropriate;
- c) encouraging the occupation of shops by independent businesses and the provision of affordable premises.

The Council will seek to protect shops outside centres by only granting planning permission for development that involves a net loss of shop floorspace outside designated centres provided that:

- d) alternative provision is available within 5-10 minutes' walking distance;
- e) there is clear evidence that the current use is not viable; and
- f) within the Central London Area, the development positively contributes to local character, function, viability and amenity.

- 10.3 The Council's powers to help protect and promote small and independent shops are limited. For example, in most cases planning permission is not required to prevent adjacent shops being combined into larger premises. We resist the loss of shop premises in our centres where we consider that this would harm the character, function, viability and vibrancy of the area, but we cannot influence the occupier of individual premises or the type of goods and services they provide. Policy DP10 sets out some measures we can pursue in order to promote the provision of small and independent shops in new developments, and to protect shops outside centres. These are discussed below.

## Provision of small shops as part of new developments

- 10.4 The Council will expect the provision of small shop units as part of large retail developments, provided that this is considered appropriate to the centre. The character of our centres and the Council's general approach to them is set out in policy CS7 of Camden's Core Strategy. Whilst the need for the provision of small units will vary on a case by case basis, we will consider the need for the provision of small units for schemes involving over 1,000 square metres of retail, and generally expect such provision for schemes of 5,000 square metres of retail or more. As a guide, small units are considered to be those that are less than 100 square metres gross floorspace, although we will take into account the character and size of shops in the local area when assessing the appropriate scale of new premises. Where appropriate, we will also use conditions on planning permissions to remove the ability of shop units in new developments to combine into larger units in the future without the need to apply for planning permission. The centre-specific profiles that support Core Strategy policy CS7 set out locations where the Council will expect the provision of small units where this is relevant to the character and function of particular centres (for example to the north of Camden High Street), and also where the provision of larger units will be supported (for example at Kilburn High Road and to the south of Camden High Street).
- 10.5 In addition to the above, we will encourage developers and owners to seek independent occupiers for small units, where possible, and provide premises at affordable rents to encourage small businesses. This will be achieved through the use of planning obligations, in line with the guidance set out in Circular 05/2005. We will work with developers to assess how such provisions can be taken forward as part of new developments. 'Independent occupiers' will be broadly considered to be businesses with no more than five stores. Affordable rents are considered to be those significantly lower than the market rate, and would normally be applied to accommodation for smaller, independent businesses. The Council will provide further details on its approach to affordable rents in an updated Camden Planning Guidance Supplementary Document.

## Protecting shops outside centres

- 10.6 Camden has many individual shops, traditional pubs, cafés and small shopping and service parades, complementing the role of larger town and neighbourhood centres. These provide for the day-to-day needs of the local population, workers and visitors and help provide locally accessible facilities for people with mobility difficulties. They also play an important social role in the surrounding community, as well as contributing to the character and identity of the local area.
- 10.7 The Council wishes to retain local shops outside centres where possible, including those on small shopping parades. Therefore, we will resist the loss of shops (Use Class A1) unless there is alternative provision within 5-10 minutes walk (approximately 400-800 metres), depending on the scale of provision. We will also take into account the viability of the premises for the existing use, in particular any history of vacancy in a shop unit and the prospect of achieving an alternative occupier. However, we recognise that, as the number of people shopping locally has declined, it is unlikely that all shops outside centres will continue to find an occupier.
- 10.8 Within Camden's Central London area, there is significant competition between competing land uses. This means that additional protection is needed to prevent the widespread loss of A1 retail uses outside centres, in order to ensure that local shops are available for local residents, workers and visitors. Therefore, the Council will only grant permission for the loss of shops outside centres in Central London where it considers that the replacement use will also contribute positively to the local area. Appropriate alternative uses are considered to be housing and uses providing essential services for residents, businesses, workers and visitors such as professional and financial services, community facilities and launderettes. When assessing such applications we will also consider guidance in our supplementary planning documents, particularly Planning Guidance for Central London and Camden Planning Guidance.

## DP12. Supporting strong centres and managing the impact of food, drink, entertainment and other town centre uses

- 12.1 Camden Core Strategy policy CS7 – *Promoting Camden’s centres and shops* sets out the Council’s overall strategy for our centres and associated uses. It seeks to promote successful and vibrant centres, for example by:
- designating a hierarchy of town centres, Central London Frontages and neighbourhood centres;
  - promoting new retail development at King’s Cross, Euston and Camden Town, with additional retail in the growth areas at Tottenham Court Road, Holborn and West Hampstead and in existing centres;
  - seeking to protect the character and role of each of Camden’s centres; and
  - resisting the loss of shops where this would cause harm to the character and function of a centre or shopping provision in the local area.
- 12.2 Core Strategy policy CS7 also seeks to make sure that the impact of food, drink, entertainment and other town centre uses on residents and their local area is minimised. This is particularly important in Camden given the borough’s wide range of bars, restaurants and entertainment venues, which are concentrated in our centres and central London, areas with significant residential communities.
- 12.3 Policy DP12 below builds on Core Strategy policy CS7 and the advice contained in national Planning Policy Statement (PPS) 6 – *Planning for town centres* (and any subsequent guidance) by setting out our detailed approach to managing the impact of food, drink and entertainment uses and other uses suitable for centres. It is therefore important to refer to Core Strategy policy CS7 and PPS6 alongside policy DP12.

**DP POLICY**

## **DP12 – Supporting strong centres and managing the impact of food, drink, entertainment and other town centre uses**

The Council will ensure that the development of shopping, services, food, drink, entertainment and other town centre uses does not cause harm to the character, function, vitality and viability of a centre, the local area or the amenity of neighbours. We will consider:

- a) the effect of non-retail development on shopping provision and the character of the centre in which it is located;
  - b) the cumulative impact of food, drink and entertainment uses taking into account the number and distribution of existing uses and non-implemented planning permissions, and any record of harm caused by such uses;
  - c) the impact of the development on nearby residential uses and amenity, and any prejudice to future residential development;
  - d) parking, stopping and servicing and the effect of the development on ease of movement on the footpath;
  - e) noise and vibration generated either inside or outside of the site;
  - f) fumes likely to be generated and the potential for effective and unobtrusive ventilation;
  - g) the potential for crime and anti-social behaviour, including littering;
- To manage potential harm to amenity or the local area, the Council will, in appropriate cases, use planning conditions and obligations to address the following issues:
- h) hours of operation;
  - i) noise/vibration, fumes and the siting of plant and machinery;
  - j) the storage and disposal of refuse and customer litter;
  - k) tables and chairs outside of premises;
  - l) community safety;
  - m) the expansion of the customer area into ancillary areas such as basements;
  - n) the ability to change the use of premises from one food and drink use or one entertainment use to another (within Use Classes A3, A4, A5 and D2);
  - o) the use of local management agreements to ensure that the vicinity of premises are managed responsibly to minimise impact on the surrounding area.

Contributions to schemes to manage the off-site effects of a development, including for town centre management, will be sought in appropriate cases.

- 12.4 Town centre uses include shops and markets (Use Class A1), financial and professional services (A2), cafes and restaurants (A3), drinking establishments (A4), hot food takeaways (A5), offices (B1a), hotels (C1), community uses (D1), including neighbourhood police facilities, and leisure uses (D2), and a number of other uses not in any use class (see *Other town centre uses* below). Policy DP12 will be applied to proposals for these uses, whether located inside or outside of a centre.
- 12.5 New shops, services, food, drink and entertainment uses can add to the vitality and vibrancy of Camden's centres and local areas. However, they can also have other impacts such as diverting trade and displacing existing town centre functions. As a result, the Council will seek to guide such uses to locations where their impact can be minimised. When assessing proposals for these uses the Council will seek to protect the character and function of our centres and prevent any reduction in their vitality and viability by requiring sequential assessments and impact assessments where appropriate (in accordance with Planning Policy Statement 4 *Planning for Sustainable Economic Growth*), and though implementing this policy.

- 12.6 The Council will not grant planning permission for development that it considers would cause harm to the character, amenity, function, vitality and viability of a centre or local area. We consider that harm is caused when an impact is at an unacceptable level, in terms of trade/turnover; vitality and viability; the character, quality and attractiveness of a centre; levels of vacancy; crime and anti-social behaviour, the range of services provided; and a centre's character and role in the social and economic life of the local community. We will consider the cumulative impact of additional shopping floorspace (whether in a centre or not) on the viability of other centres, and the cumulative impact of non-shopping uses on the character of the area.
- 12.7 The Council's area planning documents (for Camden Town, Central London, West Hampstead and Finchley Road/Swiss Cottage) and Camden Planning Guidance supplementary planning document give more detailed guidance on how we will treat planning applications for shops, food, drink and entertainment uses in particular centres, taking into account their specific circumstances. They also provide guidance on when we consider that concentrations of food, drink and entertainment uses, and reductions in the proportion of premises in retail use, would be likely to cause harm to the character, function, vitality and viability of a centre. We will take these, and any other relevant supplementary guidance into account when we assess applications in these locations. We will also take into account any history of vacancy in shop units and the prospect of achieving an alternative occupier for vacant premises when considering proposals that involve the loss of retail premises.

### **Food drink and entertainment uses**

- 12.8 Core Strategy Policy CS7 states that the Council will make sure that food, drink and entertainment uses do not have a harmful impact on residents and the local area, and indicates that such uses are most appropriately located in Camden's Central London Frontages, Town Centres and the King's Cross Opportunity Area. It recognises both the positive and negative impacts of food, drink and entertainment uses. Whilst these uses contribute to the vibrancy and attractiveness of the borough, they can also cause harm to areas in which they are located, including potential impacts on residential amenity. Camden's image as a dynamic and attractive place is in part due to the number and quality of restaurants, bars and entertainment venues in the borough, with Camden Town and Covent Garden having particular concentrations of such premises. These play an important part in the night time economy of Camden and of London, socially, economically and in terms of job provision. However, night-time activity can also lead to problems such as anti-social behaviour, fear of crime, noise, congestion and disturbance. Please see Core Strategy policy CS9 for more on our approach to food, drink, entertainment uses in Central London.
- 12.9 Conflicts can arise as, due to the borough's densely developed, mixed use nature, much night-time activity occurs close to places where people live. In addition, large numbers of such uses can change the character of the area in which they are located and reduce its range of shops or the quality of the shopping environment. Conflicts can be made worse where a particular location becomes a focus for late night activity. The Council's area planning documents (for Camden Town, Central London, West Hampstead and Finchley Road/Swiss Cottage) and our Camden Planning Guidance supplementary document give more detailed guidance on how we will treat planning applications for shops, food, drink and entertainment uses in particular centres, taking into account their specific circumstances. They also provide guidance on when we consider that concentrations of food, drink and entertainment uses, and reductions in the proportion of premises in retail use, would be likely to cause harm to the character, function, vitality and viability of a centre. We will take these, and any other relevant supplementary guidance, into account when we assess applications in these locations..
- 12.10 Within each of Camden's centres, the Council will seek to prevent concentrations of uses that would harm an area's attractiveness to shoppers or its residential amenity. The Council wishes to see a wide range of entertainment uses within its centres, not just those that primarily involve drinking, and will encourage suitable uses that contribute towards this.

- 12.11 Where food, drink and entertainment uses are permitted, they will need to be managed to protect the amenity of residents and the potential for additional housing in the area. To ensure such uses do not harm amenity or the character of an area, either individually or cumulatively, we will consider applying controls on:
- hours of operation;
  - refuse and litter;
  - noise/vibration;
  - fumes;
  - customer area;
  - local management issues; and
  - changes of use.
- 12.12 Where appropriate, we will use planning conditions or obligations to ensure that any remaining impact is controlled. Policy DP26 *Managing the impact of development on occupiers and neighbours* sets out further measures to manage the impact of development on amenity.
- 12.13 The Council will seek to ensure that community safety issues associated with proposals are fully addressed. As well as appropriate design measures, the Council will seek financial contributions towards management arrangements, including street wardens, CCTV, town centre management and other community safety schemes through the use of planning conditions and obligations, where appropriate. Camden's Statement of Licensing Policy sets out the Council's approach to licensing and the expectations that the Council and the Metropolitan Police have for those involved in licensed activities.
- 12.14 The Council's Camden Planning Guidance supplementary document gives further borough-wide advice on the impact of food, drink and entertainment uses. Detailed guidance on how we will consider applications for such uses in particular centres is set out in our area planning documents (for Camden Town, Central London, West Hampstead and Finchley Road/Swiss Cottage).

### **Other town centre uses**

- 12.15 A number of uses commonly found in centres (and smaller shopping parades) are not included in the A1, A2, A3, A4, A5, B1a, D1 or D2 Use Classes. These include amusement arcades, launderettes, saunas and massage parlours, car showrooms and minicab offices. While centres are generally the most appropriate location for these uses, the Council will carefully consider their potential impact when assessing planning applications to make sure that they do not harm the centre or the amenity of neighbours.

12.16 Particular issues that may arise include emissions and noise (e.g. from launderettes), highway and traffic problems (e.g. from minicab offices and car showrooms) and community safety and the fear of crime (e.g. from amusement arcades, betting shops, massage parlours and saunas, particularly where there are concentrations of such uses). Amusement arcades, massage parlours and saunas are unlikely to be considered acceptable in the busiest parts of centres or near to housing, schools, places of worship, hospitals or hotels.

- Planning Policy Statement (PPS) 4 - Planning for Sustainable Economic Growth; CLG; 2009

## DP26. Managing the impact of development on occupiers and neighbours

- 26.1 Camden's Core Strategy seeks to sustainably manage growth so that it takes place in the most appropriate locations and meets our needs while continuing to conserve and enhance the features that make Camden such an attractive place to live, work and visit (see policy CS1). Promoting and protecting high standards of amenity is a key element in this and will be a major consideration when the Council assesses development proposals. Core Strategy policies CS5 – *Managing the impact of growth and development* and CS14 – *Promoting high quality places and conserving our heritage* set out our overall approach to protecting the amenity of Camden's residents, workers and visitors, a major factor in people's quality of life. Policy DP26 contributes to the implementation of the Core Strategy by making sure that the impact of a development on occupiers and neighbours is fully considered.

### DP POLICY

#### DP26 – Managing the impact of development on occupiers and neighbours

The Council will protect the quality of life of occupiers and neighbours by only granting permission for development that does not cause harm to amenity. The factors we will consider include:

- a) visual privacy and overlooking;
- b) overshadowing and outlook;
- c) sunlight, daylight and artificial light levels;
- d) noise and vibration levels;
- e) odour, fumes and dust;
- f) microclimate;
- g) the inclusion of appropriate attenuation measures.

We will also require developments to provide:

- h) an acceptable standard of accommodation in terms of internal arrangements, dwelling and room sizes and amenity space;
- i) facilities for the storage, recycling and disposal of waste;
- j) facilities for bicycle storage; and
- k) outdoor space for private or communal amenity space, wherever practical.

- 26.2 Development should avoid harmful effects on the amenity of existing and future occupiers and to nearby properties. When assessing proposals the Council will take account the considerations set out in policy DP26. The Council's Camden Planning Guidance supplementary document contains detailed guidance on the elements of amenity.

#### Visual privacy, overlooking, overshadowing, outlook, sunlight and daylight

- 26.3 A development's impact on visual privacy, overlooking, overshadowing, outlook, access to daylight and sunlight and disturbance from artificial light can be influenced by its design and layout, the distance between properties, the vertical levels of onlookers or occupiers and the angle of views. These issues will also affect the amenity of the new occupiers. We will expect that these elements are considered at the design stage of a scheme to prevent potential negative impacts of the development on occupiers and neighbours. To assess whether acceptable levels of daylight and sunlight are available to habitable spaces, the Council will take into account the standards recommended in the British Research Establishment's *Site Layout Planning for Daylight and Sunlight – A Guide to Good Practice (1991)*.

## Artificial lighting levels

- 26.4 Lighting creates a sense of safety and can enable activities in the evenings and at night. It can be used to highlight landmark buildings and add vitality to our streets. Lighting can increase the potential for natural surveillance and, where used correctly, can reduce the opportunity for criminal activity and increase the likelihood of it being challenged and/or reported. However, poorly designed internal and external lighting or lighting that operates for an excessive period of time is a form of pollution that can harm the quality of life for those living nearby, affect wildlife and waste energy. Camden's dense character means that light pollution can be a bigger problem in the borough than in lower density areas where uses are not so close together. For example, lighting from conservatories can affect neighbours living above, as well as to the sides and rear, and the lighting of advertisements can affect people living nearby. Glare and light spillage from poorly designed lighting can make it less easy to see things at night and effect wildlife as well as people. Lighting should only illuminate the intended area and not affect or impact on its surroundings. Schemes involving floodlighting and developments in sensitive areas, such as adjacent to sites of nature conservation importance, should employ a specialist lighting engineer accredited by the Institute of Lighting Engineers to ensure that artificial lighting causes minimal disturbance to occupiers and wildlife. For further details on lighting and occupiers and biodiversity please see our Camden Planning Guidance supplementary document.

## Noise and vibration

- 26.5 Noise/vibration pollution has a major effect on amenity and health and can be a particularly significant issue in Camden given the borough's dense urban nature. More detail on how to prevent disturbance from noise and vibration, including the requirement for mitigation measures can be found in policy DP28.

## Odours, fumes and dust

- 26.6 Camden suffers from extremely poor air quality which has a harmful impact on health and the environment. More detail on how the Council is tackling poor air quality can be found in policy DP32. Camden Planning Guidance provides information on how developments should be designed to prevent occupants from being exposed to air pollution, including mitigation measures.

26.7 Odours, fumes and dust can be generated from commercial cooking, industrial process and construction and demolition. We will require all development likely to generate odours to prevent them from being a nuisance by installing appropriate extraction equipment and other mitigation measures. Further details on mitigation measures and where extraction equipment should be located can be found in Camden Planning Guidance. Further details on limiting noise from extraction equipment can be found in DP28. The Council will limit the disturbance from dust due to construction and demolition by expecting developers and their contractors to follow the London Councils' Best Practise Guidance *The control of dust and emissions from construction and demolition*. We will also expect developers to sign up to the Considerate Constructors Scheme. Details of how these will be implemented should be provided in a Construction Management Plan. Please see below for further details on Construction Management Plans.

## Microclimate

26.8 Developments, especially when large, can alter the local climate. For example, a light coloured building that reflects heat will stay cool on the inside and the outside, whereas a dark building will absorb heat during the day to raise internal temperatures and slowly release this heat as the temperature cools, keeping the local air temperature warmer. Buildings can also affect the flow of air and cause wind tunnels. All developments should consider local topography and the local microclimate in their design. Developments large enough to alter the local climate will be required to submit a statement demonstrating how the design has considered local conditions. Detail of what is expected in such a statement can be found in the Camden Planning Guidance.

## Attenuation measures and Construction Management Plans

26.9 Most potential negative effects of a development can be designed out or prevented through mitigation measures. For example, appropriately located and insulated extraction equipment can prevent nuisance caused by strong odours and fumes. An air tight building with mechanical ventilation and good insulation can make living adjacent to railways and busy roads acceptable with regards to noise, vibration and internal air quality. We will require any attenuation measures to be identified prior to planning permission being granted and secured for the lifetime of the development.

26.10 Disturbance from development can also occur during the construction phase. Measures required to reduce the impact of demolition, excavation and construction works must be outlined in a Construction Management Plan. We will require Construction Management Plans to identify the potential impacts of the construction phase of the development and state how any potential negative impacts will be mitigated. Construction Management Plans may be sought for:

- major developments;
- basement developments;
- developments involving listed buildings or adjacent to listed buildings;
- developments that could affect wildlife;
- developments on sites with poor or limited access; and
- developments that could cause significant disturbance due to their location or the anticipated length of the, demolition, excavation or construction period.

For further details on construction management plans please refer to our Camden Planning Guidance supplementary. Please see policy DP27 for more on our approach to basements.

## Standards of accommodation

26.11 The size of a dwelling and its rooms, as well as its layout, will have an impact on the amenity of its occupiers. Residential standards and guidance are contained in our Camden Planning Guidance supplementary document. Policy DP6 outlines our approach to Lifetime Homes and further detail can be found in Camden Planning Guidance. Details on our approach to providing facilities for waste and for bicycle storage can also be found in Camden Planning Guidance. Details on our requirements for the provision of cycle parking can be found in DP18 – *Parking standards and limiting the availability of car parking*.

26.12 Outdoor amenity space provides an important resource for residents, which is particularly important in Camden given the borough's dense urban environment. It can include private provision such as gardens, courtyards and balconies, as well as communal gardens and roof terraces. The Council will expect the provision of gardens in appropriate developments, and particularly in schemes providing larger homes suitable for families. However, we recognise that in many parts of the borough this will not be realistic or appropriate. In these locations, the provision of alternative outdoor amenity space, for example, balconies, roof gardens or communal space will be expected. These amenity spaces should be designed to limit noise and disturbance of other occupiers and so not to unacceptably reduce the privacy of other occupiers and neighbours.

## DP28. Noise and vibration

- 28.1 Noise and vibration can have a major effect on amenity and health and therefore quality of life. Camden's high density and mixed-use nature means that disturbance from noise and vibration is a particularly important issue in the borough. Camden's Core Strategy recognises the importance of this issue for Camden's residents and policy DP28 contributes to implementing a number of Core Strategy policies, including CS5 – *Managing the impact of growth and development*, CS9 – *Achieving a successful Central London*, CS11 – *Promoting sustainable and efficient travel* and CS16 – *Improving Camden's health and well-being*.

### DP POLICY

#### DP28 – Noise and vibration

The Council will seek to ensure that noise and vibration is controlled and managed and will not grant planning permission for:

- a) development likely to generate noise pollution; or
- b) development sensitive to noise in locations with noise pollution, unless appropriate attenuation measures are provided.

Development that exceeds Camden's Noise and Vibration Thresholds will not be permitted.

The Council will only grant permission for plant or machinery if it can be operated without cause harm to amenity and does not exceed our noise thresholds.

The Council will seek to minimise the impact on local amenity from the demolition and construction phases of development. Where these phases are likely to cause harm, conditions and planning obligations may be used to minimise the impact.

- 28.2 The effect of noise and vibration can be minimised by separating uses sensitive to noise from development that generates noise and by taking measures to reduce any impact. Noise sensitive development includes housing, schools and hospitals as well as offices, workshops and open spaces, while noise is generated by rail, road and air traffic, industry, entertainment (e.g. nightclubs, restaurants and bars) and other uses.
- 28.3 The Council will only grant planning permission for development sensitive to noise in locations that experience noise pollution, and for development likely to generate noise pollution, if appropriate attenuation measures are taken, such as double-glazing. Planning permission will not be granted for development sensitive to noise in locations that have unacceptable levels of noise. Where uses sensitive to noise are proposed close to an existing source of noise or when development that generates noise is proposed, the Council will require an acoustic report to ensure compliance with PPG24: *Planning and noise*. A condition will be imposed to require that the plant and equipment which may be a source of noise pollution is kept working efficiently and within the required noise limits and time restrictions. Conditions may also be imposed to ensure that attenuation measures are kept in place and effective throughout the life of the development.
- 28.4 In assessing applications, we will have regard to the Noise and Vibration Thresholds, set out below. These represent an interpretation of the standards in PPG24 and include an evening period in addition to the day and night standards contained in the PPG, which provide a greater degree of control over noise and vibration during a period when noise is often an issue in the borough.

**Table A: Noise levels on residential sites adjoining railways and roads at which planning permission will not be granted**

Noise description and location of measurement	Period	Time	Sites adjoining railways	Sites adjoining roads
Noise at 1 metre external to a sensitive façade	Day	0700-1900	74 dB $L_{Aeq}$ 12h	72 dB $L_{Aeq}$ 12h
Noise at 1 metre external to a sensitive façade	Evening	1900-2300	74 dB $L_{Aeq}$ 4h	72 dB $L_{Aeq}$ 4h
Noise at 1 metre external to a sensitive façade	Night	2300-0700	66 dB $L_{Aeq}$ 8h	66 dB $L_{Aeq}$ 8h

**Table B: Noise levels on residential streets adjoining railways and roads at and above which attenuation measures will be required**

Noise description and location of measurement	Period	Time	Sites adjoining railways	Sites adjoining roads
Noise at 1 metre external to a sensitive façade	Day	0700-1900	65 dB $L_{Aeq}$ 12h	62 dB $L_{Aeq}$ 12h
Noise at 1 metre external to a sensitive façade	Evening	1900-2300	60 dB $L_{Aeq}$ 4h	57 dB $L_{Aeq}$ 4h
Noise at 1 metre external to a sensitive façade	Night	2300-0700	55 dB $L_{Aeq}$ 1h	52 dB $L_{Aeq}$ 1h
Individual noise events several times an hour	Night	2300-0700	>82 dB $L_{Amax}$ (S time weighting)	>82 dB $L_{AMAX}$ (S time weighting)

**Table C: Vibration levels on residential sites adjoining railways and roads at which planning permission will not be granted**

Vibration description and location of measurement	Period	Time	Vibration levels
Vibration inside critical areas such as a hospital operating theatre	Day, evening and night	0000-2400	0.1 VDV ms <sup>-1.75</sup>
Vibration inside dwellings	Day and evening	0700-2300	0.2 to 0.4 VDV ms <sup>-1.75</sup>
Vibration inside dwellings	Night	2300-0700	0.13 VDV ms <sup>-1.75</sup>
Vibration inside offices	Day, evening and night	0000-2400	0.4 VDV ms <sup>-1.75</sup>
Vibration inside workshops	Day, evening and night	0000-2400	0.8 VDV ms <sup>-1.75</sup>

Where dwellings may be affected by ground-borne regenerated noise internally from, for example, railways or underground trains within tunnels, noise levels within the rooms should not be greater than 35dB(A)<sub>max</sub>

**Table D: Noise levels from places of entertainment on adjoining residential sites at which planning permission will not be granted**

Noise description and measurement location	Period	Time	Sites adjoining places of entertainment
Noise at 1 metre external to a sensitive façade	Day and evening	0700-2300	$L_{Aeq}$ 5m shall not increase by more than 5dB*
Noise at 1 metre external to a sensitive façade	Night	2300-0700	$L_{Aeq}$ 5m shall not increase by more than 3dB*
Noise inside any living room of any noise sensitive premises, with the windows open or closed	Night	2300-0700	$L_{Aeq}$ 5m (in the 63Hz Octave band measured using the 'fast' time constant) should show no increase in dB*

\* As compared to the same measure, from the same position, and over a comparable period, with no entertainment taking place

**Table E: Noise levels from plant and machinery at which planning permission will not be granted**

Noise description and location of measurement	Period	Time	Noise level
Noise at 1 metre external to a sensitive façade	Day, evening and night	0000-2400	5dB(A) <LA90
Noise that has a distinguishable discrete continuous note (whine, hiss, screech, hum) at 1 metre external to a sensitive façade.	Day, evening and night	0000-2400	10dB(A) <LA90
Noise that has distinct impulses (bangs, clicks, clatters, thumps) at 1 metre external to a sensitive façade.	Day, evening and night	0000-2400	10dB(A) <LA90
Noise at 1 metre external to sensitive façade where LA90>60dB	Day, evening and night	0000-2400	55dBL $_{Aeq}$
