I would just like to point out that :

1. The visual appearance is not in keeping with the skyline of buildings.
2. Is not in keeping with the Style of the building.
3. The building is located in a conservation area.
4. Threat of health risks - there are academic studies exploring the issue.

Surely this would be better placed further down the railway line towards Camden, where there are wide open spaces next to more industrial sites, which do not have domestic housing near by.
