

- roof support system linear beams, centred to suit glass width (to be confirmed 1022mm c/cs shown). Fall shown 5 deg fall.
- glass to be tripple glazed to improve sound resistance (strong enough to walk on?)
- architectural grating to cover drain to perimeter of rooflight flush with window frame

NOTE:
 For section & elevation details
 please refer to drawing number
 AH-PR60-PGA_AH02

For planning site location plan please
 refer to drawing AH-PR60-PGA_AH03
