### 4. Description of the Proposed Development

Please describe the proposed development, including relevant information covering noise, odour, storage and handling waste, hours of opening and transport and highways impacts of the development. Where the building is located in a key shopping area, please provide details of any undesirable impact on the sustainability of that shopping area:

The proposal is for the change of use of a shop (A1 class) to a restaurant (A3 class). It will involve the installation of an extraction duct for the kitchen (similar in characteristics to the one that the property No. 149 has on its rear facade). That duct has been designed and described on the drawings, and will be at least 1 m higher than the roof of the property.

The property will have a customers area, kitchen, toilet, office space for the restaurant management and storage area. The waste will be handled using the storage area for a temporary waste storage, and removing the bins through the side door that faces the side alleyway (which is an open space that connects with the street).

The opening hours for the premises as a restaurant will be from 11:00 a.m. to 00:00 (13 hours) everyday.

The premises does not provide a specific parking area due to the lack of space, as it is a property with reduced surface, however, this is a specially well connected area by public transport. It is really close to the underground/national/international rail station King's Cross-St Pancras, Furthermore, the street that this property is facing (King's Cross Road) comprises several bus lines to connect with the rest of London., and therefore the location of the premises does not constitute a problem in the sense of how customers can arrive there. In relation to its locations, it is also important to remark that there are other premises with the same use class at the same street and with similar or same opening ours, and consequently not significantly additional disturbance will be created to the surrounding area.

Are any associated building works or other operations required to make this change?  Yes  No

If yes, please provide details of the siting, design and external appearance of the building including ventilation and extraction (including the provision of an external flue) and the storage of rubbish:

Only an internal partition (not load-bearing wall) will be removed and an extraction duct showed in the submitted drawings will be installed for the ventilation and reduction of smell from the kitchen.

continued:

What is the total floor space to be changed to restaurant and cafes?  m2

Has any of the building or land within its curtilage been previously changed under Class C Shops (Class A1), Financial and Professional Services (Class A2), Betting Offices, Pay Day Loan Shops and Casinos (Sui Generis Uses) to Restaurants and Cafes (Class A3)?

Yes  No

If Yes, what was the total floor space changed to Restaurants and Cafes?  m2

**Development is not permitted if the development (together with any previous development under Class C) would result in more than 150 square metres of floor space in the building having changed use under Class C.**
