# 3.0 The Proposal

## 3.5. Access

Main access to upper ground floor is proposed through Brill Place where the existing entrance is. We propose to dismantle the existing DDA lift and the large box surrounding it and having instead a platform lift next to the existing staircase to allow disabled access to be done through the same part of the building. Special attention will be paid to make sure it fits in the overall design of the entrance.

Examples of platform lifts
