2017/2513/L	David Stone	Willow Road NW3 1TN NW3 1TN	13/06/2017 15:28:22	COMMEM AIL	<p>Dear Camden</p> <p>I write in support of this planning application.</p> <p>The plan for lower ground floor works is thoughtful, well designed, and supported by appropriate documentation. The proposed changes will make a big difference to the space without making a significant difference to the exterior of the Grade II Listed row of terraces.</p> <p>The applicant has confirmed in writing two issues relating to the placement of the boiler flue and the exploratory works proposed in the lightwell and in relation to the boundary treatment:</p> <p>(a) The flue, and associated compliant flue guard, for the new combi boiler will be at or just below ground level and not visible from the street.</p> <p>(b) Any action to be taken on the basis of evidence revealed from the exploratory works in the lightwell and in relation to the boundary treatment will be the subject of separate planning applications.</p> <p>I therefore happily support the application.</p>
