5, Daleham mews.

This house was over expanded years ago, before the conservation area and planning control. The original brick roof outlines can be seen. And now it would seem that further expansion is planned reducing the amenity for many neighbours although this is difficult to judge from the rather wobbly plans presented, they are somewhat opaque.

5 Daleham Mews is visible from Belsize Crescent, a Jubilee Walk route, as well as from Daleham Mews, a lesser road but a lovely one, these views are important for the integrity of the conservation area, if such things exist any more.

I am slightly baffled by the need for an outside entrance to a 'study'. Is there a plan for a business set up there? Fine and good if there is local employment and people arrive on foot, everyone needs work and local is best but that isn't necessarily the case.

The overbuilt building will be larger and even more intrusive than it already is. I ask that you refuse this application and ask for; Clearer plans, Why an outside 'study' entrance is needed

Thanks.

Jane Boardman,
