2017/2813/P	Mrs Anne Jarman	200 Park Street Lane	28/06/2017 16:03:53	COMMNT	<p>As owner of the freehold for 56 St Pancras Way and landlord to tenants in Flat 56b I have 2 points to raise.</p> <p>1. The railing requested to be removed is positioned at the bottom of the steps to flats 56b and 56c. I believe it was put there to minimise the risk of anyone stumbling and falling into the below ground window recess. We should take the council's advice on the proposed removal of this railing and whether it poses a health and safety risk.</p> <p>2. I would like to request provision of a skip and/or timely removal of waste from the site during building works. We have ongoing challenges with dumping of waste and contamination of household recycling in the front garden. Large amounts of building waste/refuse left in the front garden for any sustained period is likely to attract further dumping. It has taken time and effort to bring the waste situation under control and I would like to avoid a recurrence of the problem. I purchased a lockable bin store to prevent contamination of household recycling and I request that this must also remain in place throughout the building works.</p>
