2017/2864/P	Claire Lewis	2 Regents Park Terrace London NW17EE	29/06/2017 08:35:59	OBJEMAIL	I think building of basements are not helpful in Camden particularly in the light of traffic build up and congestion likely to be caused by HS2. And Skips,noise ,dust and more pollution will add to the chaos. I also feel that the solid structure of the houses in the area will be compromised as a precedent is set to build basements. I lived next to a basement project once. I had to wear ear muffs during the day. It is simply too much upset for anyone trying to live near such a project. Planners architects and owners are not the people who suffer. Neighbours do
