Also seeing how well West Hampstead farmers market has been managed over the years, we can be confident the people behind this application will do a great job. |

The WEGCAAC has always been a great supporter of the local Farmers Market and believes that the Saturday Market adds considerably to enhancing the local community and adding to its growing vibrancy. However, we fully support ALL of the objections raised by the Neighbourhood Development Forum (NDF) posted on 29 June. We are particularly concerned about the impact on local independent businesses which already struggle against the competition from four major supermarket chains and the fact that the proposed market could dissuade new businesses from considering entering the area. We would like to see this application rejected outright and for the Farmers Market group to consider recasting their application on a much smaller scale and for a trial period to determine whether the demand even exists for the proposed market. |
