The width of the central ridge to the upper roof is narrowed slightly, and the new roof form sits within the sightlines of the previously approved roof profile. The proposed alteration to the roof profile has no adverse impact on the previously approved sight lines from the adjacent windows at 15 Parliament Hill. Very good sight lines are maintained (The previously approved ridge location is shown dotted in red).

The profile of the roofs is altered. The form, construction, and detailing of the roofs is simplified. A strong visual identification with existing adjacent roof forms is maintained.
