A world first

550mm

The Zayed Centre for Research into Rare Disease in Children, due for completion in 2018, will be the world's first purpose-built centre dedicated to the scientific discovery and treatment of children's rare diseases.

Bringing the brightest minds together in state-of-the-art laboratory facilities, the Zayed Centre for Research will serve as a global research hub, benefitting children and families from around the world.

A better future for seriously ill children

The Zayed Centre for Research is named in recognition of the extraordinary philanthropic support of Her Highness Sheikhha Fatima bint Mubarak in honour of her late husband, Sheikh Zayed bin Sultan Al Nahyan, Founder of the United Arab Emirates and Ruler of the Emirate of Abu Dhabi.

The creation of the Zayed Centre for Research has also been made possible thanks to the generosity of supporters of Great Ormond Street Hospital Charity.
