Dear Nick and Gerry,

I am writing to inform you that I will be removing a subsiding stem from a Bay tree located at the above address. The property is located within a Conservation Area and the stem is posing an immediate risk to safety, therefore I will not be submitting a formal 6 week notification and completing the work as a matter of urgency.

The base of the tree has Gannoderma Spp. brackets around its circumference, and since my previous visit a month ago one of the stems (with the worst amount of decay) has begun to subside (please see the attached photograph). The stem is heavily weighted towards a highway.

Please let me know if you have any objections or require any further information?

Kind regards, Alex
