To Teesa Craig
Planning application 2017/2868/P

I am writing in connection with the above planning application and want to register our objection.

The reason is the this changes would have a major impact on quex road.

Firstly the opening of the side door on quex road will push people off pavement and onto the path of the traffic

Secondly it would cause distraction to driver when they are navigating this bend into quex road

Thirdly there has already been one fatality at this junction in past which we suspect had been due to distraction at the junction.

Fourthly this changes would increase extra footfall to the quex road which is not a high road.

Quex road is a residential street and it is evident that this changes would have devastating impact on our life as residents as it would bring light nuisance due to signs...

The increase in other issues would be the noise from people coming in and out... and other relevant stuff. ...

We hope the residents would be look after rather than the increase in pay for council and blighting our lives.

We hope the variation would also not be allowed as it would set bad precedent for the area and shows the developers can make changes once they have finished the development.

yours sincerely
K zafrani
