2017/3036/P	Jonathan Asser	31 Camden Mews	05/07/2017 17:39:13	COMMNT	Now that planning permission has been given and our view will be blocked, anything further that can be done to mitigate the intrusion from views back into our main living space from the north elevation windows and roof terrace is appreciated. We now have a five-month-old baby, and we are dreading the impact on his health and wellbeing from living so close up to such a major ongoing building development with all its attendant noise and air pollution. Anything that can be done to minimise the impact of noise and air pollution would be greatly appreciated. And anything that can be done to shorten the construction period would be greatly appreciated.
