1. Fibre to be brought into lightwell via new core drill and inserted in black flexible uPVC sleeve which will in turn be pinned to the wall around the lightwell as shown to reach under stairs area.

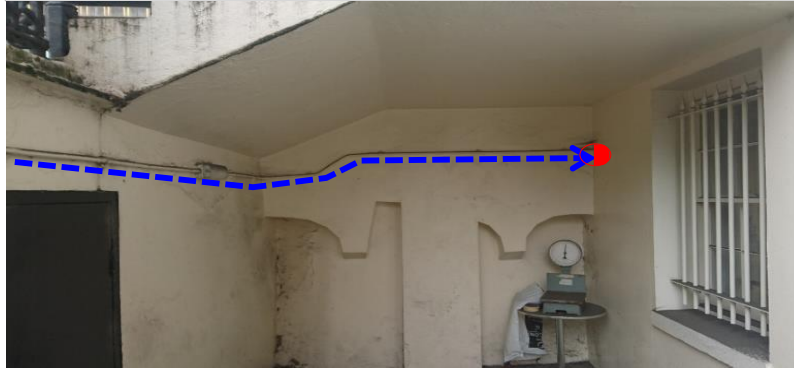

3. From here, 50mm uPVC trunking will be installed to route the fibre to the back wall of the office where another entry point will be created to the records room

5. The fibre will be routed through the records room at high level with more uPVC trunking to the opposite corner and then another entry point will be created to the server room.

2. A new entry point will be created to the lower ground floor office and the cable brought into the office

4. From here, 50mm uPVC trunking will be installed to route the fibre to the back wall of the office where another entry point will be created to the records room

6. The fibre will be routed through the records room at high level with more uPVC trunking to the opposite corner and then another entry point will be created to the server room.
