**FASCIA**

Acrylic letter with brushed side and the depth from the wall is 100mm  
 Acrylic letter with brushed side and the depth from the wall is 70mm  
 Acrylic letter and the depth from the wall is 30mm

**New Security Roller Grill Shutter:**  
 The new roller grill shutter is powder coated to match with the shop front and fascia board, dark brown (Hex 453823) and electrically operated via remote control. In order to enhance the visibility, the existing shutter will be replaced with a new roller grill.

**REVISED SECTION THROUGH FASCIA**

**REVISED SHOPFRONT**

**Pilaster**

To respect the existing classic architectural features of the shopfront and building, we will restore the existing plinth, pilaster and console bracket to its original status and then repaint with the same colour to the neighbours' (crème colour).

**Timber Stall Riser**

The existing shopfront will be replaced with new timber panelled stall riser with 300mm height as this is the height of plinth of the pilaster. The colour for the stall riser is the same colour to the shop front timber frame. This is to add a traditional look of the shop while still being in harmony with neighbours. Please refer to [A.1009 Neighbourhood photos].

**Timber Shopfront Frame**

New timber and glass shopfront with single door entrance will be decorated in dark brown.

**Transom:** Horizontal grazing bar has been added to give more traditional look.
