

227 Goldhurst Terrace

London NW6 3EP

17th July 2017

Re Plane tree at 229 Goldhurst terrace.

To whom it may concern.

We support Mr Robert Gold's application to remove more than 30% of the above mentioned tree for the following reasons.

1. The tree produces a huge amount of leaves which, when they fall, block our gutters and drains. This has led to overflowing, which has caused water to penetrate the walls of our house, requiring remedial work. This is an ongoing nuisance.
2. The tree casts a large shadow over our rear garden which means we get no sunlight on our decking during a summer's afternoon. This adversely effects the enjoyment of our property.
3. We are prone to occasional very strong gusts of wind from the south-west. The effect is amplified by the presence of tower blocks in that direction. Our property would lie in the fall line. Cutting back the tree in a major way would reduce the risk of the tree, or a large limb, falling on to our property. The tree has become very large and such an event could cause considerable damage and/or injuries.

Yours sincerely

David Huyton
