14 July 2017

Dear Ms Henry

I write to state my strong objection to the proposals made in the Planning Applications 2017/0415/L and 2017/0414/P.

2017/0415/L The gutting of the Workhouse will needlessly destroy fine architectural detail together with the history of this notorious institution.

2017/0414/P The destruction of everything else on the site, including the burial ground, is an abomination. The pioneering work of Florence Nightingale to nurse the sick in two Pavilion Wards, built to her specifications in conjunction with the architect John Giles, records a significant development in the history of nursing. This must be not be allowed to be obliterated because of the ignorance of planners and developers.

Yours faithfully

Vicky Stewart
