2017/1689/P	Ky Tran	2 Rossetti Court Ridgmount Place London WC1E 7AG	25/07/2017 23:28:53	COMMNT	<p>As there is no option to log our comments once as a collective unit, we will log the same comments individually. Please find below are the collective comments from the Rossetti Court residents.</p> <ol style="list-style-type: none"> <li>1. Our previous comments logged by the Rossetti Court residents for the 11th May 2017 deadline still stand as our concerns still not being addressed nor did we received any feedbacks regarding our concerns except for a big technical document to read and decipher.</li> <li>2. Why did the Camden Council posted the new yellow notice with the new comment due date for Wednesday 26th July 2017 on the Ridgmount Street (which is further away from the Rossetti Court) and left the old yellow notice with the old comment due date for Thursday 11th May 2017 on Ridgmount Place which is directly outside our place of resident? Is this a deliberate attempt to stop us from putting forward our comments. This is wrong ethically, professionally and technically and we want Camden to explain why this has happened. Luckily, someone notice the misinformation on the 25th July 2017, otherwise we may not have a chance to put forward our comments.</li> <li>3. The Equus' noise assessment document (PLD 17 64084 Noise survey.pdf) was written in favour of G-Research, therefore we residents of Rossetti Court would like to know who from Camden Council will be representing the interest of local residents to professionally review and advise the residents and impact of the proposal as stated in the PLD 17 64084 Noise survey.pdf document.</li> <li>4. We residents of Rossetti Court would like to get further clarification on the following points regarding the "PLD 17 64084 Noise survey.pdf" document forward to us:- ? Page 1 Section 1 Introduction which stated that "This report presents the results of daytime and night-time environmental noise surveys undertaken to establish the ambient/background noise conditions prevailing at the rear of the subject premises". Did Equus actually carried out the daytime and night-time noise ass</li> </ol>
