Dear Charles

Re Henderson Court 102 Fitzjohns Avenue London NW3 6NR

I am writing to object to Planning Application 2017/0969/P due to

a) the visual prominence of the hand rail (see below) that creates a roof terrace in the Hampstead Conservation Area that is detrimental to the form of the building and against Hampstead Conservation Area Guideline H31, and

b) the new telephone mast on the East corner will be directly above one of the bedrooms in the old people's home. The International Commission for Non Ionizing Radiation Safety Guidelines should be disregarded as they focus on the largely irrelevant heating effect, rather than the subtler but profoundly important biological effects. Camden Council has a duty to take extra care of elderly who are not in a position to voice concern or opposition.

Yours sincerely
