Dear Seonaid

RE: Sample Panel of Brickwork Lady Chapman – Condition 9i

As consented the new build North, East and West façade of Lady Chapman will follow the same design detail than the existing retained South elevation. This includes window details and colour, brick specification to match the existing in colour and dimensions and brick specials details.

Mount Anvil have previously established on site with Rachael Parry and confirmed via letter on 28 September 2016 the agreed brick and colour mix (1 part orange, 4 parts red) to the new build facade. This was based on two sample panels built on site of the specified Sussex Beckley Red and Orange Imperial.

Based on the above you have agreed with Mount Anvil that no additional mock-up will be required in order to discharge the relevant Lady Chapman façade condition, 9i.

Existing South Elevation, retained, February 2016

Existing façade details, to be replicated on new elevations. Replacement stone to be Bath stone, as the existing.

Existing windows are single glazed, new windows to same detail but double glazed.

Existing retained chimney and coping details

Mock-up panels for new brickwork Lady Chapman from September 2016 site visit with Rachael Parry:

Left hand panel:

Beckley Orange Imperial

Right hand panel:

Beckley Red Imperial

Measurement of the original brickwork taken on site: 225-228x67mm

Measurement of Sussex Beckley dimensions – 225x107.5x67mm

Your sincerely,

Brigitte Rothfuss
