London Borough of Camden Planning

Below is my objection to the most recent planning application for 1A Highgate Road

Attachments 1/2 PLANNED ENTRANCE

Where are the bins going please confirm that this is not planned right next to my bedroom window. Is this new bricked up plan for a roof 'terrace' and bin rooms below or are the next to each other. As a bin room this is too close to my bedroom wall and window and if its a roof terrace it will give immediate access to my home and take away my security and privacy being so close to my windows. Once again proposal not clear are the new proposed *internal?* doors at the end of this new structure to replace or in addition to the louvre doors. If it is for both it should be reversed and the rubbish should be nearer to the new property because of the noise that will reverberate along the wall which is a continuation of my bedroom and the new entrance by the looks of things. Will it be sound proofed. We already have to be extra vigilant at the front of our building because we are very prone to rat infestation.

Attachment 3 CHANGES TO BUILDING ENTRANCE

Proposed additional windows look into my home and 1B and are only 5/6 metres away, which is too close.

Attachment 4 ROOF ACCESS HATCH AND INCREASE IN FLAT-ROOF AREA

Is this going to be used as a terrace, why else would a an access hatch and wider unbroken area be necessary. Considerable health and safety issue. I would imagine will lead to a further application or some kind of fencing. Once again privacy security and NOISE will be unacceptable.

Attachment 5/6 We are now talking about changing the use of 99.9% DEMOLISHED warehouses buildings (without prior relevant demolition application being made).

How can we be discussing alterations to warehouses entrance or roof under CHANGE OF USE RULES.
PLEASE ASK DEVELOPER TO TIDY UP DAMAGE TO OUR PARTY WALL

Diane Ross
Flat A 1 Highgate Road
