2017/3358/P	John Stedman	11 CENTREPOINT HOUSE 15a St Giles High Street WC2H 8LW WC2H 8LW	31/07/2017 20:37:45	INT	I am a resident of Centre Point House and, like all the residents, have suffered loss of health, wealth and comfort and wellbeing due to the various planning permissions granted to this development by Camden Council. It has now become apparent that our long term health and comfort will be permanently affected by the various chimneys, flues, ventilation etc that will discharge smoke, pollution, steam, poisons, grease and food smells into the spaces directly under our balconies, windows, bedrooms and living areas. We are faced with a 'slow death' and the possibility of our flats being uninhabitable, unrentable and suffering massive loss of capital value. But most importantly, our individual health is now in danger and I urge, in the strongest possible terms not only that this new application is resoundingly rejected but also all past planning permissions are checked to ensure that all relevant rules, laws and statute were correctly followed by Camden Council.
