Dear Nora-Andrea, dear Bethany,

In the name of Flat 9, Rosslyn Court, 10 Ornan Road we would like to object the requested planing application 2016/5652/P at Ornan Court for the following reasons:

a) The previous application was only rejected 13 months ago. If the neighbours want to refile they should wait three years. Despite us rejecting they have never consulted with us residents next door reflecting our concerns over the last 10 years

b) As residents of Rosslyn Court, we have been informed that we have until at least the 21st March to submit a full objection and will be writing further.

c) Tree roots will be impacted with the extended lightwell.

c) more of the front garden will be removed.

d) the instalation of the lift and the excavation in general is not in keeping with the improtant historic building and the digging will have impact on the stability of our ground

e) There seems to no documents that relate to the build

f) our PC also thinks that the new light measurments are not complete.

g) It claims the building is a c3 dwelling house when it is in fact sui generis

h) finally, our house is already moving materially and the further digging will influence the stability of our building.

I) while the opposite hotel counts already to many people in the street additional flats will further worsen the situation.

In summary, we do object again and would kindly ask the counsel to reiterate the objection from less than 3 years ago.

Please confirm that you have received objection.

Best regards

Family klaus Hessberger & Dagmar Einoeder
