

Application No:	Consultees Name:	Consultees Addr:	Received:	Comment:	Response:
2017/3381/L	John Stedman	11 CENTREPOINT HOUSE 15a St Giles High Street WC2H 8LW WC2H 8LW	31/07/2017 22:15:08	APP	This application and everything associated with it presents a clear health and safety danger to the residents of Centre Point House. Flues, chimneys and extractors throwing out poisons, fumes, steam and pollution directly below/adjacent to living and sleeping areas and balconies and windows. Post "Grenfell Tower" it is clear that planning permission for dangerous structures, cladding, chimneys/venting etc etc have been carelessly granted and that many, many residential blocks have been put into danger and in particular, dangerous living conditions have been imposed on residents. This application should be summarily dismissed and all previous applications associated with it should be re-examined in the light of the Grenfell Tower tragedy and all previous permissions should be withdrawn.
