I object to the proposed building extensions to the Waterhouse for the main reason that construction vehicles will attempt go down the unique lane that leads to kenwood.

If an alternative route is assured I will withdraw this objection

Objection to plan if construction vehicles use the country lane.

I realise that the complex building plans, which I now hear include a hydrotherapy pool and two extensions , may help improve the life of one rich disabled person but I feel he or she would agree that other less privileged disabled people should not be disadvantaged by the building plans.

Nor should other lane users, such as mothers pushing children, children of all ages, people of all abilities and ages walking along that lane, cyclists, people walking their own dogs , joggers, runners, people using the women's pond. Just one morning I observed 10 runners, a wheelchair user, someone using a mobility scooter, two elderly women with walking sticks, two men pushing their toddlers in push chairs , some mothers with babies in prams, 5 children with families , three cyclists, bird watchers, etc. Please think of our needs as well as the harm the lorries would do to the natural environment, the birds and the nature of that special lane.
