2017/3692/P	Claire Withey	20 Cromwell Rd FInchley London N3 2ET	04/08/2017 16:40:38	OBJ	The risk of construction traffic causing injury and distress to the public has not been adequately assessed. Recently on several occasions ,we have had to wait in the verge so that lorries can pass on Millfield Lane . As someone who has to use a walking frame and / or wheelchair this has been very scary and I was at high risk of falling. Vehicles using Millfield Lane must be restricted in size so that there is room for the public, including those with disabilities , and emergency vehicles to still pass free of risk. If larger vehicles are needed access needs to be through Fitzroy Park. The lane already has a number of pot holes and gets muddy and water laden in the winter . An increase in traffic is likely to cause further damage which will make using a wheelchair along the lane very difficult.
