2017/3847/P	Valerie St Johnston	30 Fitzroy Road London NW1 8TY	07/08/2017 10:13:39	COMMNT	I wish to protest at the overblown and inappropriate plans for this development. It is too dense, too high for its neighbourhood and will create too much extra traffic and parking in an already congested area, Chalk Farm Road and roads to the east. Why was it described as six storeys when it reaches 11 at least? It will be visible and ugly from many classic viewpoints in and on Primrose Hill and from the Regent's Canal. The simple access from the canal to Morrisons which is much used would be at risk. At present the petrol station is on a slip road, neatly adjacent to Chalk Farm Road; its new position is less accessible.
2017/3847/P	Fabio Busetto	65 Gilbeys Yard	04/08/2017 09:30:55	COMMNT	To whom it may concern,  I am seriously concern about the noise &vibration impact assessment of the construction process and how this has been carried out. For unknown reasons, it was avoided to test the southern border of the construction site (Gilbeys Yard), a quiet residential area. As a resident, I strongly oppose the application without further testing and related mitigating actions being carried out first.
2017/3847/P	Cllr Richard Cotton	Members' Room Camden Town Hall Judd Street London WC1H 9EG	04/08/2017 15:38:38	COMM	I am concerned about the scale, mass and bulk of the buildings, which would appear to be much greater than the existing townscape and may have a harmful impact on the area's architectural and industrial heritage. The development may also impact adversely on the Primrose Hill Conservation Area on the other side of the west coast main line. I share residents' concerns about an increase in traffic flows, which will already be under pressure from HS2 construction traffic. Such a large development will impact on the public transport infrastructure and indeed infrastructure more generally.
2017/3847/P	Karen Hodgkin	Flat 2 56A Chalk Farm Road	07/08/2017 23:15:05	OBJ	Viewing the daylight and overshadowing assessments causes me significant concern that the proposed height of the buildings on Chalk Farm Road (up to 6 storeys) will result in considerable loss of natural light for residents living opposite. Additionally the view from our flat will be significantly affected. The height of the planned buildings should be more in keeping with existing construction.

2017/3847/P	Cindy	43 King Henry's Road	07/08/2017 09:26:56	COMMEM PER	Dear sir madam

I have lived in a primrose Hill for just short of thirty years now.

I would like to inject to the re development of the Morrison aperil station for the following reasons.

This is a historic site and highly visible from our landmark viewpoint the hill.

Mainly our air quality is suffering already. I have recently been diagnosed with COPD. As a non smoker this makes me think our poor air quality must be a cause. When people say pollution relates feathers this is what they are talking about.

Yours Cindy Palmano
