

## **EXTRACTOR FAN** Cookology ARCH900SS 90cm Curved Angled Stainless Steel Chimney Cooker Hood

### 1- INTRODUCTION

This Designer extractor has an extraction rate of 700m<sup>3</sup>/hour, thanks in part to its powerful motor, as well as the large 150mm ducting outlet that ensures more air can travel through it - efficiently and effectively removing smoke, smells and grease from the air in the kitchen. This will prevent grease building up on walls and kitchen furniture and make cooking more enjoyable.

This Extractor features an arched stainless steel front. It features all usual essentials such as halogen lighting to help you see better when cooking, 3 different speed settings for greater control and push button controls for simple, reliable operation.

To duct the air outside using carbon filters to recirculate the air using that clean the air before recirculating the air back into your kitchen.
