2017/4036/P	B.M. Shaughnessy	20 Kylemore Road London NW6 2PT	13/08/2017 20:27:59	OBJEMPER	<p>You will receive many objections to this amending application as this was already an extraordinarily badly designed scheme which attracted very widespread opposition. Indeed the planning committee voted against it. The suggested changes have now made it unsustainable.</p> <p>The new application (despite the misleading cover letter) involves very significant material changes which Camden planning must consider as serious breaches of the permission granted and a contravention of the terms set out by the Inspector & Secretary of State.</p> <p>The proposed, incoherent and unsafe configuration of the building, windows, balconies, plant and lobby areas etc is a regrettable (commercial) relapse which goes against all current concerns about highrise tower blocks.</p> <p>This is an opportunity for the Camden Planning committee to stand up again against a now dangerously poor and exploitive scheme which Essential Living should not have submitted in the current climate or at any other time.</p> <p>We count on you to refuse this application.</p>
