2017/4365/P	Jordan Archer	35 George Mews Camden London NW1 2EU	14/08/2017 11:42:06	OBJ	We object to the planning application as we believe it will have a detrimental effect on the area for the residents who live directly behind it. The existing smells emanating from the existing restaurant is already unpleasant and unacceptable. Further smoke and smells caused by the restaurant will only make the area smell worse. We have a terrible problem with vermin therefore with another addition of a restaurant will only make the problem worse. It will attract people to an area that already suffers from a high level of crime and an area that is badly affected by drug use and abuse. Residents of George Mews already have to tolerate unacceptable level of smells that come from restaurants that back on to the mews. the new alterations to the back of the building are unsightly. It will not be a positive addition to the Drummond Street real mix also.
