2017/3869/P	On behalf of Belsize Residents Associations, Sanya Polescuk	8a Belsize Court Garages	17/08/2017 22:12:27	OBJ	The fully rendered proposal is incongruous with the context of its immediate conservation area which is dominated by red-brick buildings of late 19th and early 20th century. It is possible to thermally improve the solid brick buildings by adding the insulation to walls internally. Perhaps a combination of internal insulation for the front and sections of side elevations and externally insulated and rendered rear elevation would be more appropriate in this instance. The proportions of the upper floor, street-facing windows is poor. The treatment of the front garden wall is equally inappropriate for the area, proposing a forbidding, over-guarded and regrettably bland appearance.
