THE GEORGIAN GROUP GUIDE:

WINDOW FRAME:

"Window frames of the earlier eighteenth century should preferably be a form of broken white. There is increasing evidence, however, that later in the century window surrounds in a context of brick or masonry were being painted in darker colours, usually brown or green, or were grained; window frames in the context of stucco were often brown, grey or some other dark colour. Broken white window frames only became standard with the Georgian Revival of the late nineteenth century"
