Dear Alex

PROPOSED SUBTERRANEAN DEVELOPMENT OF 34 CREDITON HILL, HAMPSTEAD, LONDON NW6

I can confirm that I, Andrew Ilsley of Form Structural Design Limited (Form) have been appointed as the project structural engineer to undertake the above project, providing a full service.

I further confirm that I am a Chartered Structural Engineer – C.Eng.M.I.Struct.E. and I have been appointed to design and supervise the structural construction work throughout their duration.

Form have undertaken close to 250 similar projects in Camden, the Royal Borough of Kensington & Chelsea and Westminster over the last 5 years with retrospective subterranean development.

Our rigorous approach to design is brought to all of our projects to minimise the risk of problems arising, both during the construction works on site and beyond. This risk management applies not only to the buildings and sites being developed and refurbished but also to the adjoining properties and sites.

This role will typically involve weekly site visits at the very beginning of the Contract and fortnightly thereafter. The project is reviewed and checked at all key stages by the company principal or Associate Directors (both Chartered Structural Engineers) as part of the company's in house quality assurance procedure.

Yours faithfully

Andrew Ilsley C.Eng M.I.Struct.E
Director
