Having considered the proposals with reference to information held in the Greater London Historic Environment Record and/or made available in connection with this application, I conclude that the proposal is unlikely to have a significant effect on heritage assets of archaeological interest.

This application lies within the London Suburbs Archaeological Priority Area adjacent to the medieval site of the Bishop of Ely's Inn. However, in view of the extensive modern ground disturbance and limited new groundworks proposed the development is unlikely to cause significant harm.

No further assessment or conditions are therefore necessary.

Please note that this response relates solely to archaeological considerations. If necessary my Historic Buildings and Areas colleagues should be consulted separately regarding statutory matters.

Yours sincerely
