2017/3951/P	Howard Perlin	66 Hawtrey Road London NW3 3SS	29/08/2017 17:35:31	COMMEM AIL	I have no objection to the proposed works but would ask the committee to ensure that the guidelines on noisy working and traffic movements are adhered to. The guidelines on noisy works were consistently breached during the works at 56 Hawtrey Road with noisy work taking place late into the evenings and across the whole weekend. Our requests to the builders and owners to adhere to the guidelines were ignored and it was impossible to obtain any response from Camden's Environmental Department. The close is small and filled with residents' cars so I request that the committee ensures the implementation of a traffic management plan so that the removal of spoil and the parking of builders' vehicles does not impact on other residents.
