2017/4157/P	Heath Atkins	28 Great James Street	30/08/2017 23:05:29	OBJ	<p>I would like to refuse planning permission for the 4 air conditioning units ( with or without acoustic panels )</p> <p>1) all air conditioning units require adequate ventilation to work efficiently . So large open air space is required for fans x 4 .</p> <p>As residents on Great James street , most bedrooms face the rear onto Emerald street , being taller properties all sound transfers across the properties .</p> <p>When a bearing , fan blade , electric motor goes wrong ( which it will ) Residents will have to put up with the loud noises ,and the continuous drone of the units , The businesses , like with the alarms that go off in the night ,are non contactable like the lighting leave everything on 24/7</p> <p>Instead of air conditioning.... open and close windows like everyone else .</p> <p>Warm days we all open our windows .... listening to droning air conditioning! Or worse when there is a fault ... No</p> <p>Dealing with noise control issues is not easy . And very time consuming</p>
2017/4157/P	Dean Naumowicz	28 Great James Street	29/08/2017 19:07:16	COMMNT	<p>At the rear of the building, these panels will face into an open space where the residents of Great James Street have a number of bedrooms. The noise during the day will seriously impact the quality of life for the residents of Great James Street in these rooms so this application should be rejected.</p>
