|-----------------|------------------|---|---------------------|----------|--|
| 2017/3674/P | Justin Dennis | 92 Albert St NW1 7NE NW1 7NE NW1 7NE | 16/09/2017 13:35:08 | OBJ | This creates a precedent for siting antennas where policy would prohibit them namely near a school. I object to Camden using its residential buildings for commercial gain especially as the nature of Camden's vested interest (the annual income from said use) in the success of this application brings into question the impartiality of the planning application process |
| 2017/3674/P | Mr J Higgins | 5A Princess Road NW1 8JN NW1 8JN NW1 8JN | 17/09/2017 20:59:32 | OBJ | I object to this application. It is a danger to local people's health especially children at the nearby school. We don't need more antennas around here. This is a Camden Council property and should not have been considered in the first place given the government sponsored 'Stewart Report' which states that this type of equipment should not be placed near schools, near the homes of children or other vulnerable people. |
| 2017/3674/P | Ms P Tarrant | 5a Princess Road NW1 8JN | 17/09/2017 20:50:26 | OBJ | I object strongly to this planning application. It is a totally unsuitable site for antennas especially in line with the Stewart Report ie it is close to a school, homes of children and vulnerable people. It is in a densely populated area. The antennae are actually unnecessary - there is good coverage in this area already. The constant radiation that these antennae emit are potentially very harmful, there should be no chance that people, and especially children, be put at risk to their health. |
| 2017/3674/P | Rob Gill | 60 Evershot Road London N4 3BB | 15/09/2017 13:01:48 | OBJ | I wish to object to this proposal on the basis locating this type of equipment is inappropriate near a school. The proposed site is too close to North Bridge House school (for children aged 7-13) accordingly. |
| 2017/3674/P | Carole MacLeod | 15c Gloucester Avenue Camden London NW1 7AU | 17/09/2017 19:06:42 | OBJ | <p>I am writing to raise my objection about the proposal to erect telecoms antennae on Parkside Court on Gloucester Avenue NW1.</p> <p>I wish to state quite emphatically that I am not in favour of this project mostly as I live in the block two doors down from the installation and am concerned about the health risks the antennae could pose to my family and also to the general neighbourhood.</p> <p>There is a primary school located virtually next door to Parkside Court and I am not convinced that there would not be harmful effects from the antennae.</p> <p>We already have a huge problem with air pollution at the Gloucester Avenue / Parkway junction and would not like to have any additional potential health risks to contend with.</p> <p>With the Camden area also to be blighted soon by the construction work linked to HS2 works it seems unfair that there is further encroachment on local residents quality of life.</p> <p>I hope my objection to this erection of Waldon Telecom's antennae will be logged.</p> <p>Yours sincerely Carole MacLeod</p> |
