2017/3353/P	V Legrove	6 FALKLAND ROAD London NW5 2PT	19/09/2017 10:32:16	OBJ	This properties original planning application to extend the property raised objections to a terrace being created on the first floor extension, so in order to 'bag' planning this area was changed to a green/planted roof. Permission is now sought to create the terrace afterall. This could have been foreseen with the original windows being removed and the large door being proposed (also granted). I object to the creation of a terrace here because of the detrimental effect it will have in terms of daylight and sunlight to the gardens of 7,9,11 and 13 Leverton Street, together with overlooking into the playground at close proximity. I also object to the loss of promised 'planted land', promised as a sweetener to get the last application through? I am surprised this wasn't conditioned in the original application as is often the case.
