2017/4892/T	Giulietta Durante	67D Agar Grove Camden Town London NW1 9UE	19/09/2017 11:33:21	OBJ	<p>I am writing to object to the proposed felling of one tree and the reduction in size of another at 14 Canteloves Road. The trees in question form part of a long bank of tall trees that run along the northern side of a triangle formed the gardens of three roads. Aside from their aesthetic value, for they form part of a whole and are incredibly beautiful to look at, they provide privacy in the triangle for those months of the year they are in leaf. Also, living on a road as busy and as polluted as Agar Grove, the trees provide (at the back at least) a haven of peace and escape from that. They also help soak up some of the carbon monoxide, which in a city as polluted as London, is surely something to be treasured. I understand that Mr. Leach, the applicant, would like to replace one of the trees with an Ash. This is, of course, much better than planting nothing, but an Ash tree can take up to 60 years to reach maturity and I doubt any of us will be around to see that.</p>
