TEN

My enquiry is

The mews is getting overcrowded with limited residents respecting its maintenance and its state. There has also been an increased misuse of the mews including parking in undesignated area of the mews resulting in restricted access and use to many residents. Increasing the size of a dwelling would imply an increased number of residents and potential increased misuse.

Also there have been very poor repairs of the mews by every property developer/owner during and post every construction projects to date - especially with heavy vehicles accessing or drilling along the mews.

Before agreeing with the construction, can we please be provided with provisions ensuring regulated parking off the mews by applicants is available and will be adhered to and also provisions for the mews to be correctly maintained/repared during and post building ?
